The ideal profile system for machine construction.

With the Alvaris aluminium building set you can quickly and efficiently our idea of a perfect machine rack, protective fence, test range, worktable. Running position changes and a perfect interplay characterise our system – and our style of processing your project.

Quality profile.

Extruded. Strictly tested. Our profiles are made from top-quality raw materials and with strict tolerances. Thanks to standard grid dimensions and clever connection methods, they even dock to unfamiliar systems.

The service modules.

All profiles, accessory parts and connection elements in this catalogue can be supplied from stock. Profiles can be supplied in lengths of 6 m or as tailor-made cuts, processed ready for installation, if requested. We will be happy to supply fully installed systems according to your plans or support you during planning and projecting. If your task requires special or new components, we will develop or procure them quickly.

PROFILE RANGE 8

Profile 8 30x30

ORDER N°. PRO8.3030

L=6000+30 mm

m=0,9kg/m

A=3,29cm²

W_x=2,16cm³

W_y=2,16cm³

I_x=3,13cm⁴

I_y=3,13cm⁴

Profile for light and cost-effective constructions. The 8mm wide longitudinal grooves allow standard sliding blocks (except for sliding blocks with ridge, heavy) to be inserted. When slewing in ensure that correct direction is used, since the groove is asymmetrically shaped.

Profile 8 30x30 1N

ORDER N°. PRO8.30301N

L=6000+30 mm

m=0,92kg/m

A=3,29cm²

W_x=2,26cm³

W_y=1,08cm³

I_x=3,45cm⁴

I_y=2,64cm⁴

Profiles for light-weight and economic structures with a closed groove to protect against dirt penetration and to act as a visual feature. The width of the groove is 8 mm and permits the use of standard T nuts (except for T nuts with a „heavy“ spacer). Because of the asymmetric shape, be sure to select the correct direction of insertion.

Profile 8 30x30 2N 90°

ORDER N°. PRO8.30302N90

L=6000+30 mm

m=0,95kg/m

A=3,51cm²

W_x=2,26cm³

W_y=2,26cm³

I_x=3,45cm⁴

I_y=3,45cm⁴

Profiles for light-weight and economic structures with a closed groove to protect against dirt penetration and to act as a visual feature. The width of the groove is 8 mm and permits the use of standard T nuts (except for T nuts with a „heavy“ spacer). Because of the asymmetric shape, be sure to select the correct direction of insertion.

Profile 8 R30 90°

ORDER N°. PRO8.R3090

L=6000+30 mm

m=0,83kg/m

A=3,06cm²

W_x=1,72cm³

W_y=1,70cm³

I_x=2,68cm⁴

I_y=2,62cm⁴

Profile for bracing, cover hoods, display cases, tables and other decorative visible surfaces. The groove width of 8 mm makes possible the use of standard groove stones (except for groove stones with heavy base). Due to the asymmetric groove form, the pivoting direction is to be taken into consideration.

PROFILE RANGE 8

ALVÁRIS
PROFILE SYSTEMS

Profile 8 60x30

ORDER N°. PRO8.6030

L=6000+30 mm

m=1,84kg/m

A=6,83cm²

W_x=4,53cm³

W_y=7,49cm³

I_x=6,81cm⁴

I_y=22,68cm⁴

Profile for light and cost-effective constructions. The 8mm wide longitudinal grooves allow standard sliding blocks (except for sliding blocks with ridge, heavy) to be inserted. When slewing in ensure that correct direction is used, since the groove is asymmetrically shaped.

Profile 8 60x30 2N

ORDER N°. PRO8.60302N

L=6000+30 mm

m=1,92kg/m

A=7,11cm²

W_x=4,11cm³

W_y=8,09cm³

I_x=6,42cm⁴

I_y=22,43cm⁴

Profile for light and inexpensive constructions with closed groove against the infiltration of dirt and as decorative visible surface. The groove width of 8 mm makes possible the use of standard groove stones (except for groove stones with heavy base). Due to the asymmetric groove form, the pivoting direction is to be taken into consideration.

Profile 8 60x60

ORDER N°. PRO8.6060

L=6000+30 mm

m=2,63kg/m

A=13,50cm²

W_x=14,50cm³

W_y=14,50cm³

I_x=43,60cm⁴

I_y=43,60cm⁴

Profile for light and cost-effective constructions. The 8mm wide longitudinal grooves allow standard sliding blocks (except for sliding blocks with ridge, heavy) to be inserted. When slewing in ensure that correct direction is used, since the groove is asymmetrically shaped.

Angle section Al

ORDER N°. WINAL

L=6000+10/-5 mm

m=0,33kg/m

A=1,23cm²

W_x=0,24cm³

W_y=0,43cm³

I_x=0,26cm⁴

I_y=0,78cm⁴

The angle section can be used for universal attachment of surfaces and as a rabbet for doors. It can be attached later to the grooves of the Profile Range 8 and can be fixed with threaded pins.

Cable channel 40x40

ORDER N°. KAB4040

L=6000+70mm

m=0,68kg/m

A=2,52cm²

W_x=1,62cm³

W_y=2,92cm³

I_x=4,01cm⁴

I_y=5,92cm⁴

U shaped cable channel which in combination with the cover profile is exceptionally suitable in order to lay cables and hoses. In combination with system profiles, the form and the material make up a shapely unit. The screw ribs make possible the attachment of various elements in the channel.

Cable channel – Cover 40

ORDER N°. KABDEC40

Connector set 8 30 single

ORDER N°. VERSTZ8.30E

Steel/galvanised m=20g/pc.

Scope of delivery:

- 1 Basic element Steel galvanised
- 1 Cylinder head screw specialized M6 Steel galvanised
- 1 Sliding block M6 steel with ridge galvanised

Non-positive profile connector from Range 8 30. Easy to use and little outlay (step drill into one of the connecting profiles). The profiles can be variably set and can also be inserted retrospectively into existing constructions. Recommended tightening force = 10Nm.

Connector set 8 30 double

ORDER N°. VERSTZ8.30D

Steel/galvanised m=40g/pc.

Scope of delivery:

- 1 Basic element Steel galvanised
- 2 Cylinder head screw specialized M6 Steel galvanised
- 1 Sliding block M6 steel with ridge galvanised

Non-positive profile connector from Range 8 30. Assembly is simple, involving little outlay (boring into one of the connecting profiles). The profiles can be variably set and can also be inserted retrospectively into existing constructions. The double tightening force and the long sliding block provide optimal stability and also act as an anti-twisting device. Recommended tightening force = 10Nm.

Connector set 8 60 double

ORDER N°. VERSTZ8.60D

Steel/galvanised m=70g/pc.

Scope of delivery:

- 1 Basic element Steel galvanised
- 2 Cylinder head screw specialized M6 Steel galvanised
- 1 Sliding block M6 steel with ridge galvanised

Non-positive profile connector from Range 8 30. Assembly is simple, involving little outlay (boring into one of the connecting profiles). The profiles can be variably set and can also be inserted retrospectively into existing constructions. The double tightening force and the long sliding block provide optimal stability and also act as an anti-twisting device. Recommended tightening force = 10Nm.

Connector set 40 single

ORDER N°. VERSTZ40E

Steel/galvanised m=50g/pc.

Scope of delivery:

- 1 Basic element Steel galvanised
- 1 Cylinder head screw specialized M8 Steel galvanised
- 1 Sliding block M8 steel with ridge galvanised

Non-positive profile connector. Assembly is simple, involving little outlay (boring into one of the connecting profiles). The profiles can be variably set and can also be inserted retrospectively into existing constructions. Recommended tightening force = 25Nm.

Connector set 40 double

ORDER N°. VERSTZ40D

Steel/galvanised m=80g/pc.

Scope of delivery:

- 1 Basic element Steel galvanised
- 2 Cylinder head screw specialized M8 Steel galvanised
- 1 Sliding block M8 steel with ridge galvanised

Non-positive profile connector. Assembly is simple, involving little outlay (boring into one of the connecting profiles). The profiles can be variably set and can also be inserted retrospectively into existing constructions. The double tightening force and the long sliding block provide optimal stability and also act as an anti-twisting device. Recommended tightening force = 25Nm.

Connector set 40 double stainless

ORDER N°. VERSTZ40DROS

Stainless steel V2A/V4A m=80g/pc.

Scope of delivery:

- 1 Basic element Stainless steel V2A
- 2 Cylinder head bold specialized M8 Stainless steel V4A
- 1 Sliding block M8 Stainless steel V2A with ridge

Non-positive profile connector. Assembly is simple, involving little outlay (boring into one of the connecting profiles). The profiles can be variably set and can also be inserted retrospectively into existing constructions. The double tightening force and the long sliding block provide optimal stability and also act as an anti-twisting device. Recommended tightening force = 25Nm.

Connector set 80 double

ORDER N°. VERSTZ80D

Steel/galvanised m=120g/pc.

Scope of delivery:

- 1 Basic element Steel galvanised
- 2 Cylinder head screw specialized M8 Steel galvanised
- 1 Sliding block M8 steel with ridge galvanised

Non-positive profile connector. Assembly is simple, involving little outlay (boring into one of the connecting profiles). The profiles can be variably set and can also be inserted retrospectively into existing constructions. The double tightening force and the long sliding block provide optimal stability and also act as an anti-twisting device. Recommended tightening force = 25Nm.

Connector set 80 double stainless

ORDER N°. VERSTZ80DROS

Stainless steel V2A/V4A m=120g/pc.

Scope of delivery:

- 1 Basic element Stainless steel V2A
- 2 Cylinder head bold specialized M8 Stainless steel V4A
- 1 Sliding block M8 Stainless steel V2A with rigde

Non-positive profile connector. Assembly is simple, involving little outlay (boring into one of the connecting profiles). The profiles can be variably set and can also be inserted retrospectively into existing constructions. The double tightening force and the long sliding block provide optimal stability and also act as an anti-twisting device. Recommended tightening force = 25Nm.

ACCESSORIES 8

Central plate set 8 30

ORDER N°. ZENSTZ8.30

Steel/galvanised m=21g/pc.

Scope of delivery:

1 Basic element Steel galvanised

1 Half-round screw M8x16 Steel galvanised

Non-positive profile connector. Easy to use and little outlay (screws / through-drill) for both of these connecting profiles. The type of connection cannot be built into an existing frame construction at a later date and there is only minimal room for play. The recommended tightening force is 25 Nm. Attention: The central plate set 8.30 can only be used for the profile series 30 with 8 mm grooves.

Central plate set

ORDER N°. ZENSTZ

Steel/galvanised m=21g/pc.

Scope of delivery:

1 Basic element Steel galvanised

1 Half-round screw with shaft M8x20 Steel galvanised

Non-positive profile connector. Easy to use and little outlay (screws / through-drill) for both of these connecting profiles. The type of connection cannot be built into an existing frame construction at a later date and there is only minimal room for play. The recommended tightening force is 25 Nm. From 8 Nm ESD capability.

Screw in connector set 8 30

ORDER N°. EINSTZ8.30

Steel/galvanised m=22g/pc.

Scope of delivery:

- 1 basic element piece zinc-plated
- 1 pan head screw special M6 piece zinc-plated
- 1 slot nut M6 piece with fixed link zinc-plated

Frictional, self-locking section connector. Simple application and the smallest amount of time and effort for processing (no chip removing process necessary). The sections are infinitely variable in their location and can also be installed retrospectively into existing constructions. This connection technology is used very often in site assembled construction. The recommended fastening torque is 10 Nm.

Screw in connector set 24 mm

ORDER N°. EINSTZ24

Steel/galvanised m=30g/pc.

Scope of delivery:

- 1 basic element piece zinc-plated
- 1 pan head screw special M8 piece zinc-plated
- 1 slot nut M8 piece with fixed link zinc-plated

Frictional, self-locking section connector. Simple application and the smallest amount of time and effort for processing (no chip removing process necessary). The sections are infinitely variable in their location and can also be installed retrospectively into existing constructions. This connection technology is used very often in site assembled construction. The recommended fastening torque is 25 Nm.

Cover cap for screw in connector 24 mm

ORDER N°. ABDEIN24

Steel/galvanised m=1g/pc.

Screw in connector set 40 double

ORDER N°. EINSTZ40D

Steel/galvanised m=59g/pc.

Scope of delivery:

- 1 Basic element Steel galvanised
- 2 Cylinder head screw specialized M8 Steel galvanised
- 1 Sliding block M8 steel with rigde galvanised

Frictional, self-locking section connector. Simple application and the smallest amount of time and effort for processing (no chip removing process necessary). The sections are infinitely variable in their location and can also be installed retrospectively into existing constructions. This connection technology is used very often in site assembled construction. The recommended fastening torques is 25 Nm.

Automatic connector set

ORDER N°. AUTVERSTZ

Steel/galvanised m=33g/pc.

Scope of delivery:

- 1 Forming screw
- 1 Screw M6x40 DIN 912
- 1 Sliding block M8 steel with rigde galvanised

For the fast and firm connection of two aluminium profiles. No profile machining. Self-cutting thread. The recommended fastening torque is 10 Nm. The covering cap is not included in the scope of delivery and has to be ordered separately. (Illustration with covering cap)

Covering cap for Automatic connector set

ORDER N°. ABDAUTVERSTZ

PA/black m=1g/pc.

Direct connector set simple

ORDER N°. DIRSTZE

Steel/galvanised m=30g/pc.

Scope of delivery:

1 Basic element Steel galvanised

1 Cylinder head screw specialized M8 Steel galvanised

Force-fit profile connector. Simple application and low processing effort (only 1 frontal thread in one of the profiles to be connected). This kind of connection cannot subsequently be built into the existing frame constructions. They can however be set in their position in a stageless manner. The one sided variation is predominantly used with frame constructions. With this type of connection, you don't have to notch the used surface element.

Direct connector set double

ORDER N°. DIRSTZD

Steel/galvanised m=43g/pc.

Scope of delivery:

1 Basic element Steel galvanised

1 Cylinder head screw specialized M8 Steel galvanised

Force-fit profile connector. Simple application and low processing effort (only 1 frontal thread in one of the profiles to be connected). This kind of connection cannot subsequently be built into the existing frame constructions. They can however be set in their position in a stageless manner. The one sided variation is predominantly used with frame constructions. With this type of connection, you don't have to notch the used surface element.

Mega connector ZAK

ORDER N°. MEGVERZAK

Steel/galvanised m = 19,9g/pc.

Scope of delivery:

1 Basic element

1 Headless screw M8x12 St galvanised

The ZAK mega connector is designed for strong connections between aluminium strut profiles. For the optimal application of the connector it is necessary to use a notching device or notching tool.

Central connector

ORDER N°. VERZV8

Steel/galvanised m = 17g/pc.

Scope of delivery:

1 Basic element

1 Headless screw M8 steel galvanised

The central connector is designed for strong connections between aluminium strut profiles. The profiles can be turned in any direction, thus enabling the assembly of non-standard configurations. The grooves of two opposite profiles remain clear and can be used for inserting field elements. It is also possible to assemble enclosed containers.

Bayonet connector 8 3Z m. screw M6x28

ORDER N°. VERBAV8

Steel/galvanised m = 15g/pc.

The bayonet connector is designed for the connection of aluminium strut profiles. The shape of the groove and the thickness of the material must be suitable for the connector.

Cross connector set

ORDER N°. SCHSTZ

ZD tin/nickel-plated m=32g/pc.

Scope of delivery:

1 Basic element

1 Headless screw

This connector is used for cross cut profiles up to an angle of 45 degrees. The necessary profile processing can be done using a drilling gauge and a hand drill. Supports or bracing cannot be subsequently set in a frame construction.

Universal connector set

ORDER N°. UNISTZ

ZDc/galvanised m=41g/pc.

Scope of delivery:

- 1 Basic element ZDc galvanised
- 1 Half-round screw M8x30 Steel galvanised
- 1 Sliding block M8 Steel galvanised

Non-positive profile connector. Easy to use and little outlay (variable drilling in one of the connecting profiles). The profiles can be variably set in their positions and can be retrospectively built into existing constructions. To guarantee an optimal fastening hold, these connectors should always be built in pairs. Twisting protection can be interrupted. The recommended tightening force is 25 Nm.

Universal butt connector set

ORDER N°. UNISTOSTZ

ZDc/galvanised m=63g/pc.

Scope of delivery:

- 2 Basic element ZDc galvanised
- 1 Half-round screw M8x45 Steel galvanised
- 1 Hexagon nut M8 Steel galvanised

Non-positive profile/joint connector. Simple to use and little outlay (only one drill per profile). These connectors are used if the profile production length is not enough and a joint proves unavoidable. To guarantee an optimal fastening hold, these connectors should be built in pairs. The recommended tightening force is 25 Nm.

Screw-in butt connector set

ORDER N°. EINSTOSTZ

Steel/galvanised m = 35g/pc.

Scope of delivery:

1 Cutting sleeve galvanised threaded steel

1 Cutting sleeve galvanised steel

1 Cylinder head screw

Screw-in butt connector, 180°, groove 8. Positive-locking connector (no machining required). Always use at least two connectors; the 2nd connector must always be inserted in the groove of the opposite profile. Simply turn the self-forming connector and threaded bushing into the groove. Align the profiles and tighten the screws.

Automatic butt connector set

ORDER N°. AUTSTOSTZ

Steel/galvanised m = 35g/pc.

Scope of delivery:

1 Cutting sleeve galvanised threaded steel

1 Cutting sleeve galvanised steel

1 Cylinder head screw

For the fast and firm face-on connection of two aluminium profiles. No profile machining. Self-cutting thread. The recommended fastening torque is 10 Nm. The covering cap is not included in the scope of delivery and has to be ordered separately. (Illustration with covering cap).

ACCESSORIES 8

Butt connector set 40 double

ORDER N°. STOSTZ40D

Steel/galvanised m=100g/pc.

Scope of delivery:

- 2 Basic element Steel galvanised
- 2 Cylinder head screw specialized M8 Steel galvanised
- 2 Lock ferrule stainless steel

Non-positive profile/joint connector. Simple to use and little outlay (only one drill per profile). Centralization and lock against rotation is accomplished by using the lock ferrule. These connectors are used if the profile production length is not enough and a joint proves unavoidable. The recommended tightening force is 25 Nm.

Butt connector set 80 double

ORDER N°. STOSTZ80D

Steel/galvanised m=180g/pc.

Scope of delivery:

- 2 Basic element Steel galvanised
- 2 Cylinder head screw specialized M8 Steel galvanised
- 2 Lock ferrule stainless steel

Non-positive profile/joint connector. Simple to use and little outlay (only one drill per profile). Centralization and lock against rotation is accomplished by using the lock ferrule. These connectors are used if the profile production length is not enough and a joint proves unavoidable. The recommended tightening force is 25 Nm.

ACCESSORIES 8

Mitre butt connector set

ORDER N°. GEHSTOSTZ

Steel/galvanised m=180g/pc.

Scope of delivery:

Basic element Steel galvanised, 5-part

2 covering caps PP

This butt connector is used for connecting two mitre-cut aluminium profiles at an angle. The installation requires the drilling of one hole in each profile. The covering caps are used for covering the holes.

Butt connector 8 M8x12

ORDER N°. VERSTV8

Steel/galvanised m=20g/pc.

Scope of delivery:

1 Threaded sleeve

1 Connector bolt

1 Threaded sleeve with internal thread M8

Combi screw-in connector for 180° butt connections, groove 8. Positive-locking connector (no machining required). Always use at least two connectors; the 2nd connector must always be inserted in the groove of the opposite profile. Simply turn the self-forming connector and threaded bushing into the groove. Align the profiles and tighten the screws.

ACCESSORIES 8

Connector set 8 30 x 30 x 30

ORDER N°. VERSTZ8.303030

ZDc m=120g/pc.

Scope of delivery:

- 1 Corner angle 40x40x40 ZDc
- 3 Self grooving special counter sunk bolts
- 1 Black cover cap for corner angle 8 30x30x30 PA

Element for the knot connection of up to three identical profiles. With the special covering cap, all profile ends are covered and thus a shapely connection which is also secured against distortion is created. This connector is often used for display cases, tables, cover hoods etc. For the assembly of surface elements the groove channels can be broken off.

Connector set 8 R30 90°

ORDER N°. VERSTZ8.R3090

ZDc m=120g/pc.

Scope of delivery:

- 1 Corner angle 40x40x40 ZDc
- 3 Self grooving special counter sunk bolts
- 1 Black cover cap for corner angle 8 R30 90°

Element for the knot connection of up to three identical profiles. With the special covering cap, all profile ends are covered and thus a shapely connection which is also secured against distortion is created. This connector is often used for display cases, tables, cover hoods etc. For the assembly of surface elements the groove channels can be broken off.

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Cube connector 30 3D

ORDER N°. WUERFELVERB303D

ZDc/galvanised m=38,5/pc.

Scope of delivery:

1 Cube connector

3 Covering cap aluminum colored finished

Cube connector for profile series 8.30. Connecting element for right-angled connection of up to three identical aluminium profiles. The round covering caps are used for covering the apertures.

Universal connector set 32x18

ORDER N°. VERSTZ3218

Steel/galvanised m=10g/pc.

Scope of delivery:

1 Anti-twist device PA black

1 Square washer M5 galvanised steel

1 Half-round screw M5x20 galvanised steel

Corner connector for profile 32x18; twist-proof.

ACCESSORIES 8

Connector set 40x40x40

ORDER N°. VERSTZ404040

ZDc m=133g/pc.

Scope of delivery:

- 1 Angle corner square 40x40x40 ZDc
- 3 Half-round screw M8x20 Steel galvanised
- 3 Locking washer M8 Steel galvanised
- 1 Covering cap for angle corner square 40x40x40 PA black

Element for connecting nodes of up to three same profiles. The special covering cap is used to cover all profile ends therefore improving the appearance and twist-safety of the connections. These connections are often used for display cases, tables and covering caps. It is possible to remove the guide channels to mount surface elements.

Connector set 40x40 45°

ORDER N°. VERSTZ404045

ZDc m=128g/pc.

Scope of delivery:

- 1 Angle corner square 40x40x40 ZDc
- 3 Half-round screw M8x20 Steel galvanised
- 3 Locking washer M8 Steel galvanised
- 1 Covering cap for angle corner square 40x40 45° PA black

Element for connecting nodes of up to three same profiles. The special covering cap is used to cover all profile ends therefore improving the appearance and twist-safety of the connections. These connections are often used for display cases, tables and covering caps. It is possible to remove the guide channels to mount surface elements.

Connector set R40-90°

ORDER N°. VERSTZR4090

ZDc m=110g/pc.

Scope of delivery:

- 1 Angle corner square 40x40x40 ZDc
- 3 Half-round screw M8x20 Steel galvanised
- 3 Locking washer M8 Steel galvanised
- 1 Covering cap for angle corner square R40 90° PA black

Element for connecting nodes of up to three same profiles. The special covering cap is used to cover all profile ends therefore improving the appearance and twist-safety of the connections. These connections are often used for display cases, tables and covering caps. It is possible to remove the guide channels to mount surface elements.

Connector set 8 30x30 with roller bearing

ORDER N°. VERSTZ8.3030ROL

Al/anodised nature m=84g/pc.

Scope of delivery:

- 1 Basic element with roller, anodised nature aluminium
- 2 Countersunk screws M8x20 galvanised

This element is suitable for the connection of a frame. The integrated roller PA makes it possible to use this frame as a sliding or sash window. Thanks to the asymmetric allocation of the rollers, the sliding windows can be slid past each other at a low distance. It is to be observed that the entire profile groove is freely accessible (Use no universal connectors or the likes). This ensures that a window can be completely opened.

Connector set 40x40 with roller bearing

ORDER N°. VERSTZ4040ROL

Al/anodised nature m=147g/pc.

Scope of delivery:

1 Basic element with roller, anodised nature aluminium

2 Countersunk screws M8x20 galvanised

This element is suitable for the connection of a frame. The integrated roller PA makes it possible to use this frame as a sliding or sash window. Thanks to the asymmetric allocation of the rollers, the sliding windows can be slid past each other at a low distance. It is to be observed that the entire profile groove is freely accessible (Use no universal connectors or the likes) . This ensures that a window can be completely opened.

Position connector set

ORDER N°. POSSTZ

ZDc/black m=85g/pc.

Scope of delivery:

2 Basic element ZDc black

1 Half-round screw M8x25 Steel galvanised

1 Washer M8 galvanised

1 Sliding block M8 Steel galvanised

Non-slip connecting set for two intersecting or parallel-running profiles. On construction, a gap of 8 mm in size is formed between the profiles. The non-slip connector can withhold forces up to 10 Nm.

Parallel connector 8

ORDER N°. VERPV8

ZDc /galvanised m=52g/pc.

Scope of delivery:

2 Basic element ZDc galvanised

2 Countersunk screw M8x20 Steel galvanised

The parallel connector is designed for light-duty connections of profiles with groove 8. No profile machining required. Simple installation. The profiles can subsequently be twisted and moved into any position.

Central connector with horizontal hammer

ORDER N°. ZENVERW

Steel/galvanised m=49g/pc.

Scope of delivery:

1 central connector slot 8, 15 mm bushing, 11 mm bolt, hammer horizontal

Positive-locking, self-locking profile connector for right-angled connection of two aluminium profiles. The hammer is positioned horizontally or vertically in relation to the bushing. The vertical central connector is particularly recommended when field elements are to be fitted into facing grooves. The field elements do not require any cutting. Fig. of vertical central connector.

Central connector with vertical hammer

ORDER N°. ZENVERS

Steel/galvanised m=49g/pc.

Scope of delivery:

1 central connector slot 8, 15 mm bushing, 11 mm bolt, hammer vertical

Half-round screw M5x8

ORDER N°. HALM58

Steel 10.9/galvanised m=2g/pc.

Half-round screw M5x12

ORDER N°. HALM512

Steel 10.9/galvanised m=2g/pc.

Half-round screw M5x12 stainless steel

ORDER N°. HALM512ROS

Steel stainless m=2g/pc.

Half-round screw M5x12 black

ORDER N°. HALM512S

Steel 10.9/galvanised m=2g/pc.

Half-round screw M5x16

ORDER N°. HALM516

Steel 10.9/galvanised m=3g/pc.

Half-round screw M5x20

ORDER N°. HALM520

Steel 10.9/galvanised m=4g/pc.

Half-round screw M8x12

ORDER N°. HALM812

Steel 10.9/galvanised m=5g/pc.

Half-round screw M8x14

ORDER N°. HALM814

Steel 10.9/galvanised m=6g/pc.

Half-round screw M8x16

ORDER N°. HALM816

Steel 10.9/galvanised m=7g/pc.

Half-round screw M8x18

ORDER N°. HALM818

Steel 10.9/galvanised m=8g/pc.

Recommended screw form for most connection types.
Other dimensions are available on request.

Half-round screw M8x20

ORDER N°. HALM820

Steel 10.9/galvanised m=9g/pc.

Half-round screw M8x20 stainless steel

ORDER N°. HALM820ROS

Steel stainless m=9g/pc.

Half-round screw M8x25

ORDER N°. HALM825

Steel 10.9/galvanised m=10g/pc.

Half-round screw M8x30

ORDER N°. HALM830

Steel 10.9/galvanised m=12g/pc.

Half-round screw M8x30 stainless steel

ORDER N°. HALM830ROS

Steel stainless m=12g/pc.

Half-round screw M8x45

ORDER N°. HALM845

Steel 10.9/galvanised m=18g/pc.

Recommended screw form for most connection types.
Other dimensions are available on request.

Countersunk screw M7 1 self-grooving

ORDER N°. SENM71SF

Steel/galvanised m=3g/pc.

Self-grooving screw for quick assembly of zinc die-cast covering caps.

Countersunk screw M7 1 self-grooving black

ORDER N°. SENM71SFS

Steel/black m=3g/pc.

Cylinder head screw

Steel 10.9 / galvanised or stainless steel

Recommended screw form for most connection types.
Other dimensions are available on request.

ACCESSORIES 8

Bracket 8 60x30x3 steel

ORDER N°. LAS8.60303ST

Steel/black m=36g/pc.

Element for non-positive reinforcement of profile connections and for attaching components to the profile constructions.

Bracket 80x40x5 steel

ORDER N°. LAS80405ST

Steel/black m=90g/pc.

Bracket 160x80x5 steel

ORDER N°. LAS160805ST

Steel/black m=470g/pc.

Element for non-positive reinforcement of profile connections and for attaching components to the profile constructions.

ACCESSORIES 8

Angle 30x30x3 steel

ORDER N°. WIN30303ST

Steel/black m=37g/pc.

Element for non-positive reinforcement of profile connections and for attaching components to the profile constructions.

Angle 40x40x5 steel

ORDER N°. WIN40405ST

Steel/black m=104g/pc.

Attachment set for angle and mounting link

ORDER N°. BEFSTZWINLAS

Steel/galvanised m=18g/pc.

Scope of delivery:

- 1 Countersunk screw M8x16 Steel galvanised
- 1 Sliding block M8 Steel galvanised

Attachment set for angle and mounting link 40x40x5 St and bracket 80x40x5 St

Attachment set for angle and mounting link

ORDER N°. BEFSTZWINLAS+

Steel/galvanised m=18g/pc.

Scope of delivery:

- 1 Countersunk screw M8x16 steel black
- 1 Sliding block M8 Steel galvanised

Angle set 8 30x30 Zn

ORDER N°. WINSTZ8.3030ZN

ZDc m=80g/pc.

Scope of delivery:

- 1 Angle 8 30x30 Zn
- 2 Half-round screw M6x14 Steel galvanised
- 2 Locking washer M6 Steel galvanised
- 2 Sliding block M6 Steel galvanised
- 1 Covering cap for angle 8 30x30 PA black

Angle for non-positive reinforcement of profile connections and for attaching components to profile constructions. When assembling surfaces the groove ledgers can be broken off.

Angle set 40x40 Zn

ORDER N°. WINSTZ4040ZN

ZDc m=130g/pc.

Scope of delivery:

- 1 Angle 40x40 Zn
- 2 Half-round screw M8x16 Steel galvanised
- 2 Locking washer M8 Steel galvanised
- 2 Sliding block M8 Steel galvanised
- 1 Covering cap for angle 40x40 PA black

Angle for non-positive reinforcement of profile connections and for attaching components to profile constructions. When assembling surfaces the groove ledgers can be broken off.

ACCESSORIES 8

Angle set 80x80 Zn

ORDER N°. WINSTZ8080ZN

ZDc m=270g/pc.

Scope of delivery:

- 1 Angle 80x80 Zn
- 4 Half-round screw M8x18 Steel galvanised
- 4 Locking washer M8 Steel galvanised
- 4 Sliding block M8 Steel galvanised
- 1 Covering cap for angle 80x80 PA black

Angle for non-positive reinforcement of profile connections and for attaching components to profile constructions. When assembling surfaces the groove ledgers can be broken off.

Angle set 80x80x80 Zn

ORDER N°. WINSTZ808080ZNSTG

ZDc m=598g/pc.

Scope of delivery:

- 1 Angle 80x80 Zn
- 8 Half-round screw M8x18 Steel galvanised
- 8 Locking washer M8 Steel galvanised
- 8 Sliding block M8 Steel galvanised
- 1 Covering cap for angle PA black

Angle for non-positive reinforcement of profile connections and for attaching components to profile constructions. When assembling surfaces the groove ledgers can be broken off.

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Angle element 1 40x40 45°

ORDER N°. WIN1404045

AL/anodized, natural color m=71g/pc.

Profile element for cross-struts, latticework and nodes.

Angle element 1 40x80 45°

ORDER N°. WIN1408045

AL/anodized, natural color m=145g/pc.

Angle element 2 40x40 45°

ORDER N°. WIN2404045

AL/anodized, natural color m=67g/pc.

Profile element for cross-struts, latticework and nodes.

Angle element 2 40x80 45°

ORDER N°. WIN2408045

AL/anodized, natural color m=133g/pc.

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Angle connector 40 45°

ORDER N°. WINVER4045

ZDc/aluminum color-coated m = 214g/pc.

For the straightforward connection of two aluminium profiles at a 45° angle.

Angle 160x160

ORDER N°. WIN160160

Grey cast iron, white / aluminium, coated (sim. RAL 9006)

m = 2610g/pc.

Scope of delivery:

1 Angle 160x160x80 Zn

Angle for positive-locking reinforcement of profile connections and for attaching components to the profile structures.

Joint 8 30x30

ORDER N°. GEL8.3030

ZDc m=137g/pc.

Scope of delivery:

1 Basic element ZDc

Moveable element for the connection of profiles in any angle up to 180°. The element can also be used as a heavy hinge.

Joint 8 30x30 with door latch

ORDER N°. GEL8.3030KLE

ZDc m=151g/pc.

Scope of delivery:

1 Basic element ZDc

1 Black door latch M5 PA

Moveable element for the connection of profiles in any angle up to 180°. The element can also be used as a heavy hinge. The model with the door latch makes possible a quick setting without tools.

ACCESSORIES 8

Joint 40x40

ORDER N°. GEL4040

ZDc m=305g/pc.

Scope of delivery:

1 Basic element ZDc

4 Anti-twist device ZDc

Mobile structural element for the connection of profiles at required angles from 0° to 180°. Can also be used as a heavy hinge.

Joint 40x40 with door latch

ORDER N°. GEL4040KLE

ZDc m=338g/pc.

Scope of delivery:

1 Basic element ZDc

1 Door latch M8 ZDc black

4 Anti-twist device ZDc

Mobile structural element for the connection of profiles at required angles from 0° to 180°. Can also be used as a heavy hinge. This specification including locking lever means that assembly is quick and you do not need tools to do it!

Joint 80x40

ORDER N°. GEL8040

ZDc m=1000g/pc.

Scope of delivery:

1 Basic element ZDc

4 Anti-twist device ZDc

Mobile structural element for the connection of profiles at required angles from 0° to 180°. Can also be used as a heavy hinge.

Joint 80x40 with door latch

ORDER N°. GEL8040KLE

ZDc m=1141g/pc.

Scope of delivery:

1 Basic element ZDc

4 Anti-twist device ZDc

1 Door latch M8 PA black

Mobile structural element for the connection of profiles at required angles from 0° to 180°. Can also be used as a heavy hinge. This specification including locking lever means that assembly is quick and you do not need tools to do it!

Jointed square set

ORDER N°. GELSTZ

ZDc m=128g/pc.

Scope of delivery:

1 Basic element ZDc

2 Half-round screw M8x18 Steel galvanised

2 Washer M8 Steel galvanised

1 Bearing bush Steel galvanised

2 Sliding block M8 Steel galvanised

Square for connecting profiles or flat elements in required positions. The jointed square is typically installed together with the locking square. The washer guarantees a fixed pivotal point which when the screw is tight, remains fixed. Typically used for constructions that often need to be re-set.

Locking square set

ORDER N°. KLESTZ

ZDc m=110g/pc.

Scope of delivery:

1 Basic element ZDc

1 Half-round screw M8x18 Steel galvanised

1 Sliding block M8 Steel galvanised

Universal attachment element for non-see-through surfaces and complex constructions. Fastening in the profile groove is accomplished with screw and sliding block. The distance to the profile edge can be set by using the millimeter raster. The raster element also includes twisting protection.

Locking square with door latch

ORDER N°. KLESTZKLE

ZDc m=163g/pc.

Scope of delivery:

1 Basic element ZDc

1 Locking lever M8 ZDc black

1 Bolt spacer black steel

1 Sliding block M8 Steel galvanised

Universal attachment element for non-see-through surfaces and complex constructions. Fastening in the profile groove is accomplished with screw and sliding block. The distance to the profile edge can be set by using the millimeter raster. The raster element also includes twisting protection.

Pivoting angle set piece

ORDER N°. SCHSTZST

Steel/galvanised m=217g/pc.

Scope of delivery:

1 Basic element Steel galvanised

each 2 Round head screw M8x14 / M6x14 Steel galvanised

each 2 Groove stones M8 / M6 Steel galvanised

each 2 Sliding blocks M8 / M6 Steel galvanised

Element for affixing shelf boards and the likes to existing frame constructions. Thanks to the special form of this attachment angle, the inclination can be set continuously.

ACCESSORIES 8

Pivoting angle set piece with door latch

ORDER N°. SCHSTZKLEST

Steel/galvanised m=237g/pc.

Scope of delivery:

1 Basic element Steel galvanised

1 Door latch M8 ZDc black

each 2 Round head screw M8x14 / M6x14 Steel galvanised

each 2 Groove stones M8 / M6 Steel galvanised

each 2 Sliding blocks M8 / M6 Steel galvanised

Element for affixing shelf boards and the likes to existing frame constructions. Thanks to the special form of this attachment angle, the inclination can be set continuously. The model with the door latch makes possible a quick setting without tools.

Connection element

ORDER N°. VERS

Steel/galvanised m=34g/pc.

Scope of delivery:

1 Basic element Steel galvanised

1 Straight pin 6m6x16 reinforced steel

1 Set screw M6x12 Steel galvanised

Connection element for additional non-slip safety catch and profile connections for constructions that are heavily used.

Sliding block M4 steel

ORDER N°. NUTM4ST

Steel/galvanised m=10g/pc.

Sliding block M4 stainless steel

ORDER N°. NUTM4STROS

Steel/stainless m=10g/pc.

Sliding block M5 steel

ORDER N°. NUTM5ST

Steel/galvanised m=10g/pc.

Sliding block M5 stainless steel

ORDER N°. NUTM5STROS

Steel/stainless m=10g/pc.

Sliding block M6 steel

ORDER N°. NUTM6ST

Steel/galvanised m=10g/pc.

Sliding block M6 stainless steel

ORDER N°. NUTM6STROS

Steel/stainless m=10g/pc.

Sliding block M8 steel

ORDER N°. NUTM8ST

Steel/galvanised m=10g/pc.

Sliding block M8 stainless steel

ORDER N°. NUTM8STROS

Steel/stainless m =10g/pc.

Universal sliding attachment element. The sliding block can be slewed in at any point along the profile groove. Self-fixing through spring-mounted ball.

ACCESSORIES 8

Sliding block M4 steel with ridge

ORDER N°. NUTM4STS

Steel/galvanised m=10g/pc.

Sliding block M5 steel with ridge

ORDER N°. NUTM5STS

Steel/galvanised m=10g/pc.

Sliding block M6 steel with ridge

ORDER N°. NUTM6STS

Steel/galvanised m=10g/pc.

Sliding block M8 steel with ridge

ORDER N°. NUTM8STS

Steel/galvanised m=10g/pc.

Sliding block M8 stainless steel with ridge

ORDER N°. NUTM8STSROS

Steel/galvanised m=10g/pc.

Universal sliding connection element with ridge for automatic positioning which guarantees an optimal bearing surface and prevents it from falling out when adjustments are made. The sliding block can be slewed in at any point along the groove. Self-fixing through spring-mounted ball.

Sliding block M5 steel with ridge / heavy

ORDER N°. NUTM5STSS

Steel/galvanised m=18g/pc.

Sliding block M6 steel with ridge / heavy

ORDER N°. NUTM6STSS

Steel/galvanised m=18g/pc.

Sliding block M8 steel with ridge / heavy

ORDER N°. NUTM8STSS

Steel/galvanised m=18g/pc.

Universal, sliding connection element for high loads, which are self-fixing through spring-mounted ball. Attention: The sliding block must be slewed in before constructing the profile, as afterwards it cannot be slewed.

Sliding block M3 Zn

ORDER N°. NUTM3ZN

ZDc m=5g/pc.

Sliding block M4 Zn

ORDER N°. NUTM4ZN

ZDc m=5g/pc.

Sliding block M5 Zn

ORDER N°. NUTM5ZN

ZDc m=5g/pc.

Universal, sliding attachment element. This element is always pre-assembled and afterwards, pressed in and moved at any point on the profile groove. Tightening the screw turns the sliding block and in-so-doing, fastens the element that needs to be attached.

Hammerhead Slot 8 M6 ridge 1,7

ORDER N°. NUTSTM6

Steel/galvanised m=3,2g/pc.

For bayonet connector 8 3Z with screw M6x28.

Covering cap for boring 7.5 mm

ORDER N°. ABDBOH75

PA/silver (RAL9006) m=1g/pc.

Covering cap 8 30x30

ORDER N°. ABD8.3030

PA/black m=4g/pc.

Covering cap 8 60x30

ORDER N°. ABD8.6030

PA/black m=7g/pc.

Covering cap 8 60x60

ORDER N°. ABD8.6060

PA/black m=15g/pc.

Covering cap 30x30 without hole for safety fence p.

ORDER N°. ABD3030

PA/black m=3,4g/pc.

Covering cap 32x18

ORDER N°. ABD3218

PA/black m=3g/pc.

Covering cap 40x16

ORDER N°. ABD4016

PA/black m=2g/pc.

Covering cap 40x40

ORDER N°. ABD4040

PA/black m=4g/pc.

Covering cap 40x40 ZN natural

ORDER N°. ABD4040ZNN

ZDc m= 24g/pc.

Covering cap 40x40 ZN black

ORDER N°. ABD4040ZNS

ZDc/black m=24g/pc.

Covering cap 40x40 45°

ORDER N°. ABD404045

PA/black m=5g/pc.

Profile cap rounded off on front side. Prevents dirt entering, prevents injuries/cuts and is a decorative end to the profile. Deburring of the profile cut edge unnecessary. Attach by pressing onto profile face.

It is most often used in zinc form when the profile end takes mechanical strain. It is attached by means of a selfgrooving screw onto the profile face.

Covering cap R40 90°

ORDER N°. ABDR4090

PA/black m=4g/pc.

Covering cap R40/80 30°

ORDER N°. ABDR408030

PA/black m=4g/pc.

Covering cap R40/80 45°

ORDER N°. ABDR408045

PA/black m=6g/pc.

Covering cap R40/80 60°

ORDER N°. ABDR408060

PA/black m=7g/pc.

Covering cap R40/80 90°

ORDER N°. ABDR408090

PA/black m=13g/pc.

Profile cap rounded off at front. Prevents the ingress of dirt as well as injuries/cuts and provides a decorative finish to the profile. Makes deburring of the cut profile edge unnecessary. Attach by pressing on to profile face.

Covering cap 80x16

ORDER N°. ABD8016

PA/black m=3g/pc.

Covering cap 80x40

ORDER N°. ABD8040

PA/black m=8g/pc.

Covering cap 80x80

ORDER N°. ABD8080

PA/black m=17g/pc.

Covering cap 80x80 45°

ORDER N°. ABD808045

PA/black m=17g/pc.

Profile cap rounded off on front side. Prevents dirt entering, prevents injuries/cuts and is a decorative end to the profile. Deburring of the profile cut edge unnecessary. Attach by pressing onto profile face.

Covering cap 120x40

ORDER N°. ABD12040

PA/black m=21g/pc.

Covering cap 120x80

ORDER N°. ABD12080

PA/black m=30g/pc.

Covering cap 160x16

ORDER N°. ABD16016

PA/black m=8,6g/pc.

Covering cap 160x40

ORDER N°. ABD16040

PA/black m=20g/pc.

Covering cap 160x80

ORDER N°. ABD16080

PA/black m=37g/pc.

Profile cap rounded off on front side. Prevents dirt entering, prevents injuries/cuts and is a decorative end to the profile. Deburring of the profile cut edge unnecessary. Attach by pressing onto profile face.

Cable channel Covering cap set 40x40

ORDER N°. KANABDSTZ4040

PA/black m=8g/pc.

Scope of delivery:

1 Cable channel-Covering cap 40x40

4 Half-round screws 4,2x9,5

For closing cable ducts on the side. Suitable for the respective cable ducts.

Cable channel Covering cap set 80x40

ORDER N°. KANABDSTZ8040

PA/black m=12g/pc.

Scope of delivery:

1 Cable channel-Covering cap 80x40

4 Half-round screws 4,2x9,5

Cable channel Covering cap set 80x80

ORDER N°. KANABDSTZ8080

PA/black m=18g/pc.

Scope of delivery:

1 Cable channel-Covering cap 80x80

4 Half-round screws 4,2x9,5

Covering profile PP black 8 30

ORDER N°. ABDPP8.30S

PP/black m=114,5g/m

Covering profile Al

ORDER N°. ABDAL

AL/anodized, natural color m=32g/m

Covering profile PP grey

ORDER N°. ABDPPG

PP/grey m=16g/m

Covering profile PP black

ORDER N°. ABDPPS

PP/black m=16g/m

Covering profile PP blue (RAL 5017)

ORDER N°. ABDPPB

PP/blue m=16g/m

Covering profile PP red (RAL 3020)

ORDER N°. ABDPPR

PP/red m=16g/m

Covering profile PP natural

ORDER N°. ABDPPN

PP/natural m=16g/m

Covering profile silver

ORDER N°. ABDPPSILBER

PP/silvermetallic matt m=15g/m

Covering profile for profile range 8.30 to prevent dirt entering profile grooves and to serve as decorative element of profile surfaces. Assembled by pressing into profile groove. Covering profile to prevent dirt entering profile grooves and to serve as decorative element of profile surfaces. Assembled by pressing into profile groove. The covering profile Al can be engraved (to label modules).

Covering profile Al

Covering profile PP

Covering profile to prevent dirt entering profile grooves and to serve as decorative element of profile surfaces. Assembled by pressing into profile groove. Economical alternative to the aluminium cover profile.

Covering-/Bordering profile PP natural

ORDER N°. ABDEINPPN

PP/natural m=26g/m

Covering-/Bordering profile PP black

ORDER N°. ABDEINPPS

PP/black m=26g/m

4mm to 6mm thick plastic element to cover profile groove or to form the edge of surfaces. Assembled by pressing into profile groove.

Covering profile 32x4

ORDER N°. ABD324

TPV/black m=160g/m

Covering profile for anti-slip and protective base or as rabbet. Attach by pressing into profile groove.

Black antistatic glide bar 8 30 PP

ORDER N°. GLE8.30PPSANT

PP/black m=90g/m

Wear-resistant gliding and/or guiding element. Work-pieces and tools carriers etc. can be transported gently. Attach by pressing into profile groove.

Black slide rail PP

ORDER N°. GLEPPS

PP/black m=140g/m

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Black sliding guide bar PAS

ORDER N°. GLEPASS

PAS/black m=250g/m

Black sliding guide bar 8 30 PAS

ORDER N°. GLE8.30PASS

PAS/black m=290g/m

Black sliding guide bar 40 PAS

ORDER N°. GLE40PASS

PAS/black m=210g/m

With this element sliding guides can be set up. These guides are characterized through their smooth running and low wear characteristics. Depending on the application the guides are screwed into the profile groove.

Sealing profile 2-4mm

ORDER N°. DIC24

SB/PVC/black m=74g/m

Sealing profile 4-6 mm

ORDER N°. DIC46

SB/PVC/black m=29g/m

Elastic element or the waterproof fastening and closure of flat elements in profile groove.

ACCESSORIES 8

Foot 8 60x30 M10

ORDER N°. FUS8.6030M10

ZDc/black m=180g/pc.

Foot 8 60x30 M12

ORDER N°. FUS8.6030M12

ZDc/black m=180g/pc.

Foot 8 60x60 M10

- 1 Threaded bolt for foot M10 Steel galvanised
- 1 Hexagon nut M10 Steel galvanised

Anti-slip pad for Foot 40

ORDER N°. ANTSTE40

NBR/black m=4g/pc.

The height of this module can be variably adjusted. Tilt correction for use on uneven surfaces. It is recommendable to use the anti-slip pad to prevent slipping and also to protect the floor. It can be assembled directly into the core boring of the profile, depending on the size of the thread, or in combination with a plate.

ACCESSORIES 8

Foot 80 M12x100

ORDER N°. STE80M12100

ZDc/black m=300g/pc. Fmax=13000N

Scope of delivery:

- 1 Basic element ZDc black
- 1 Threaded bolt for foot M12 Steel galvanised
- 1 Hexagon nut M16, galvanised steel

Foot 80 M12x130

ORDER N°. STE80M12130

ZDc/black m=350g/pc. Fmax=13000N

Scope of delivery:

- 1 Basic element ZDc black
- 1 Threaded bolt for foot M12 Steel galvanised
- 1 Hexagon nut M16, galvanised steel

Foot 80 M16x100

ORDER N°. STE80M16100

ZDc/black m=360g/pc. Fmax=13000N

Scope of delivery:

- 1 Basic element ZDc black
- 1 Threaded bolt for foot M16 Steel galvanised
- 1 Hexagon nut M16, galvanised steel

Foot 80 M16x160 levellable

ORDER N°. STE80M16100N

ZDc/black m=360g/pc. Fmax=13000N

Scope of delivery:

- 1 Basic element ZDc black
- 1 Threaded rod with internal thread for adjusting the adjustment plate from below
- 1 Hexagon nut M16, galvanised steel

Foot 80 M16x160

ORDER N°. STE80M16160

ZDc/black m=360g/pc. Fmax=13000N

Scope of delivery:

- 1 Basic element ZDc black
- 1 Threaded bolt for foot M16 Steel galvanised
- 1 Hexagon nut M16, galvanised steel

The height of this module can be variably adjusted. Tilt correction for use on uneven surfaces. It is recommendable to use the anti-slip pad to prevent slipping and also to protect the floor. It can be assembled directly into the core boring of the profile, depending on the size of the thread, or in combination with a plate.

ACCESSORIES 8

Anti-slip pad for Foot 80

ORDER N°. ANTSTE80

NBR/black m=23g/pc.

Plate ESD for Foot 80

ORDER N°. TELSTE80ESD

PA/black m=41,2g/pc.

Clamping plate 80

ORDER N°. KLE80

ZDc/black m=488g/pc.

Conductive plate for use in electrostatically protected areas.

The clamping plate is used for the connection between machine mount and the floor or wall.

Grit Foot 8 30 PA

ORDER N°. RAS8.PA

PA/black m=50g/pc. Fmax=1500N

Scope of delivery:

1 Basic element PA black

1 Threaded bolt for foot M8 Steel galvanised

The height of this module can be adjusted continuously. Assembly directly into the core boring of the profile by way of a sliding block in the profile groove. Height adjustment by turning the foot piece.

Grid foot PA

ORDER N°. RASPA

PA/black m=78g/pc. Fmax=1500N

Scope of delivery:

1 Basic element PA black

1 Threaded bolt for foot M8 Steel galvanised

ACCESSORIES 8

Castor 75

ORDER N°. LEN75

Steel/galvanised m=261g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP silver incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

Castor 75 antistatic

ORDER N°. LEN75ANT

Steel/galvanised m=250g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

Castor 75 with locking device

ORDER N°. LEN75MFES

Steel/galvanised m=261g/pc. Fmax=750N

Scope of delivery:

1 casing steel galvanised

1 wheel body PP silver incl. tyres of thermoplastic rubber elastomer (TPE) – tread colour: dark grey

1 locking lever (plastic)

Castor 75 with locking device antistatic

ORDER N°. LEN75MFESANT

Steel/galvanised m=261g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Locking lever (plastic)

Castor 75 with plate bracket

ORDER N°. LEN75MPLA

Steel/galvanised m=314g/pc. Fmax=750N

Scope of delivery:

1 casing steel galvanised

1 wheel body PP grey incl. tyres of thermoplastic rubber elastomer (TPE) – tread colour: dark grey

1 fixing plate 60x60mm

Ball bearing, thread protected castor for moveable constructions like moveable tables etc. The assembly can occur directly in the core hole of the profile or in combination with a foot plate.

ACCESSORIES 8

Castor 75 with plate bracket antistatic

ORDER N°. LEN75MPLAANT

Steel/galvanised m=314g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 60x60mm

Castor 75 with plate bracket and locking dev.

ORDER N°. LEN75MPLAUFES

Steel/galvanised m=335g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP grau incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 60x60mm

1 Locking lever (plastic)

Castor 75 with plate bracket a. locking dev. anti.

ORDER N°. LEN75MPLAUFESANT

Steel/galvanised m=335g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP grau incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 60x60mm

1 Locking lever (plastic)

Castor 75 with plate bracket a. lock. dev. heavy

ORDER N°. LEN75PLAFESS

Steel/galvanised m=657g/pc. Fmax=2000N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PA white incl. tyres PA – Tread color: white

1 Fixing plate 100x85mm

1 Locking lever

Castor 125

ORDER N°. LEN125

Steel/galvanised m=637g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP silver incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

Castor 125 antistatic

ORDER N°. LEN125ANT

Steel/galvanised m=637g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

Castor 125 with locking device

ORDER N°. LEN125MFES

Steel/galvanised m=760g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP silver incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Locking lever (plastic)

Castor 125 with locking device antistatic

ORDER N°. LEN125MFESANT

Steel/galvanised m=760g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Locking lever (plastic)

Castor 125 with plate bracket

ORDER N°. LEN125MPLA

Steel/galvanised m=759g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP grau incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 90x66mm

Ball bearing, thread protected castor for moveable constructions like moveable tables etc. The assembly can occur directly in the core hole of the profile or in combination with a foot plate.

ACCESSORIES 8

Castor 125 with plate bracket antistatic

ORDER N°. LEN125MPLAANT

Steel/galvanised m=759g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 90x66mm

Castor 125 with plate bracket and lock. device

ORDER N°. LEN125MPLAUFES

Steel/galvanised m=877g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP grau incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 90x66mm

1 Locking lever (plastic)

Castor 125 with plate bracket a. lock. dev. anti.

ORDER N°. LEN125MPLAUFESANT

Steel/galvanised m=877g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 90x66mm

1 Locking lever (plastic)

Castor 125 with plate bracket a. lock.dev. heavy

ORDER N°. LEN125SCHWERMFESPA

Steel/galvanised m=2.832g/pc. Fmax=6000N

Scope of delivery:

1 casing steel galvanised

1 wheel body PA white incl. tyres PA – tread colour: white

1 fixing plate 140x110mm

1 locking lever

ACCESSORIES 8

Fixed castor for heavy loads 75

ORDER N°. BOC75

Steel/galvanised m=204g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP silver incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

Fixed castor for heavy loads 75 antistatic

ORDER N°. BOC75ANT

Steel/galvanised m=204g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

Fixed castor for heavy loads 75 w. plate bracket

ORDER N°. BOC75MPLA

Steel/galvanised m=258g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP grau incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 60x60mm

Fixed castor for h. loads 75 w. plate bracket anti.

ORDER N°. BOC75MPLAANT

Steel/galvanised m=258g/pc. Fmax=750N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 60x60mm

Fixed castor for h. loads 75 w. plate bra.-heavy

ORDER N°. BOC75MPLAS

Steel/galvanised m=317g/pc. Fmax=1500N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PA white

1 Tyres PA – Tread color: white

1 Fixing plate 100x85mm

Ball bearing, thread protected castor for moveable constructions like moveable tables etc. The assembly can occur directly in the core hole of the profile or in combination with a foot plate.

ACCESSORIES 8

Fixed castor for heavy loads 125 antistatic

ORDER N°. BOC125

Steel/galvanised m=470g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP silver incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

Fixed castor for heavy loads 125 w. plate

ORDER N°. BOC125ANT

Steel/galvanised m=470g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

bracket

ORDER N°. BOC125MPLA

Steel/galvanised m=597g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP grau incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 90x66mm

Fixed castor for h. loads 125 w. plate bra. anti.

ORDER N°. BOC125MPLAANT

Steel/galvanised m=597g/pc. Fmax=1200N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PP black incl. tyres thermoplastic rubber elastomer (TPE) – Tread color: dark grey

1 Fixing plate 90x66mm

Fixed castor for h. loads 125 w. plate bra.-heavy

ORDER N°. BOC125SCHWERPA

Steel/galvanised m= 1.885g/pc. Fmax=7500N

Scope of delivery:

1 Casing Steel galvanised

1 Wheel body PA white

1 Tyres PA – Tread color: white

1 Fixing plate 140x110mm

Ball bearing, thread protected castor for moveable constructions like moveable tables etc. The assembly can occur directly in the core hole of the profile or in combination with a foot plate.

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Angle foot un-adjustable

ORDER N°. WINOVER

ZDc/black m=223g/pc.

Scope of delivery:

- 1 Basic element ZDc black
- 1 Half-round screw M8x16 Steel galvanised
- 1 Locking washer M8 Steel galvanised
- 1 Sliding block M8 Steel galvanised

Angle foot adjustable

ORDER N°. WINMVER

ZDc/black m=272g/pc.

Scope of delivery:

- 1 Basic element ZDc black
- 1 Half-round screw M8x80 Steel galvanised
- 1 Thread base plate M8 Steel galvanised
- 1 Half-round screw M8x16 Steel galvanised
- 1 Locking washer M8 Steel galvanised
- 1 Sliding block M8 Steel galvanised

Square for force couple fastening of floor or wall profile structures.

Floor attachment plate set

ORDER N°. BODSTZ

ZDc/black m=610g/pc.

Scope of delivery:

- 1 Basic element ZDc black
- 2 Cylinder head screw M8x30 Steel galvanised
- 2 Sliding block M8 Steel galvanised

Floor-fastening plate for leveling and strengthening machine frames.

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Post console 40

ORDER N°. PFOKON4040

AL-GD/bright m=940g/pc.

For supporting profiles. Particularly suited for the assembly of safety fences. Firmly connects the profiles to the ground.

Castor-Adapter plate M10 – 105x80

ORDER N°. ROLADPL1010580

AL-GD/bright m=810g/pc.

Universal adapter plate for 125 castor with plate. The adapter plate comes with holes pre-drilled in the grid dimensions of profile series 8.

ACCESSORIES 8

Plastic plate 4 mm grey (RAL 7035)

ORDER N°. HPL4G

Laminated panel m=5.8kg/m²

Plastic plate 5 mm grey (RAL 7035)

ORDER N°. HPL5G

Laminated panel m=7.3kg/m²

Plastic plate 6 mm grey (RAL 7035)

ORDER N°. HPL6G

Laminated panel m=8.4kg/m²

Plastic plate 8 mm grey (RAL 7035)

ORDER N°. HPL8G

Laminated panel m=11.5kg/m²

Plastic plate 10 mm grey (RAL 7035)

ORDER N°. HPL10G

Laminated panel m=14.6kg/m²

Plastic plate 10 mm grey (RAL 7035) – ESD

ORDER N°. HPL10GANT

Laminated panel m=14.6kg/m²

Composite board 3 mm Al/PE

ORDER N°. VER3ALPEGR

PE-Al anodized natural m=3,93kg/m²

Composite board 4 mm Al/PE

ORDER N°. VER4ALPE

PE-Al anodized natural m=5.8kg/m²

Surface element that can be used as room divider, protective barrier, covering caps and doors. Assemble in connection with the clamping profile, covering/ border profile, angle, uniblock, clamping/multiblock or directly in the groove. This material is moisture resistant, impact resistance and can be used in ambient temperatures between -20 and +80°C.

Surface element that can be used as room divider, protective barrier, covering caps and doors. Use in connection with the clamping profile, cover/border profile, angle, uniblock, clamping/multiblock or directly in the groove. Panel size on request.

Polycarbonate clear 3mm

ORDER N°. POL3T

PC/transparent m=3.6kg/m²

Polycarbonate clear 4mm

ORDER N°. POL4T

PC/transparent m=4.8kg/m²

Polycarbonate clear 5mm

ORDER N°. POL5T

PC/transparent m=6kg/m²

Polycarbonate clear 6mm

ORDER N°. POL6T

PC/transparent m=7.2kg/m²

Polycarbonate clear 8mm

ORDER N°. POL8T

PC/transparent m=9.6kg/m²

See-through surface element that can be used as room divider, protective barrier, for covering caps and doors. Assemble in connection with the clamping profile, covering/border profile, angle, uniblock, clamping multiblock or directly in the groove. Panel size on request.

ACCESSORIES 8

Shaft grid 20x20x3 steel zinc-coated

ORDER N°. WEL20203

Steel/galvanised m=4.6kg/m²

Shaft grid 30x30x3 steel zinc-coated

ORDER N°. WEL30303

Steel/galvanised m=4.6kg/m²

Shaft grid 40x40x4 steel zinc-coated

ORDER N°. WEL40404ST

Steel/galvanised m=4.6kg/m²

Shaft grid 40x40x4 steel powder-coated black

ORDER N°. WEL40404BES

Steel/powder-coated black m=4,6kg/m²

Surface element that can be used as room divider, protective barrier, covering caps and doors. Use in connection with the clamping profile or directly in the groove. Grid size on request.

Grid 30x30x3 steel black (RAL 9005)

ORDER N°. GIT30303ST

Steel/kunststoffbeschichtet m = 3,6kg/m²

Grid size on request

Spot-welded surface element that can be used as room divider, protective barrier, covering caps and doors. Assemble in connection with clamping profiles or directly in the groove in connection with the covering/border profile.

Grid 40x40x4 steel zinc-coated

ORDER N°. GIT40404ST

Steel/galvanised m=5.1kg/m²

Grid size on request

Hinge 8 30 PA

ORDER N°. SCH8.30PA

PA/black m=37g/pc. Fmax=100N

Hinge that cannot be unhinged for Profile Range 8 30 for the construction of small doors and movable attachments. Can be used in both left-side and right-side openings. The groove threads can, if necessary, be broken off.

Hinge PA right

ORDER N°. SCHPAREC

PA/black m=21g/pc. Fmax=100N

Hinge that can be unhinged for the construction of small doors and movable attachments. Supplied for either left-side or right-side opening.

Hinge PA left

ORDER N°. SCHPALIN

PA/black m=21g/pc. Fmax=100N

ACCESSORIES 8

Hinge PA double

ORDER N°. SCHPADOP

PA/black m=34g/pc. Fmax=100N

Unhinged hinge This model makes possible the manufacture of small doors and moveable fittings to the left and right of a stayer profile.

Hinge Steel

ORDER N°. SCHST

Steel/black m=53g/pc. Fmax=250N

Scope of delivery:

1 Hinge black steel

3 Flanged oval head screw M5x8 black steel

1 Hexagon nut M5 black steel

1 Washer M5 black steel

1 Flatheaded screw M5x16 black steel

Hinge that cannot be unhinged for the construction of doors and movable attachments. Can be used in both left-side or right-side openings.

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Hinge 8 30 ZN

ORDER N°. SCH8.30ZN

ZDc/black m=78g/pc. Fmax=750N

Not unhinged hinge for the manufacture of heavy doors and moveable attachments. The groove channels can be broken off. Through the long holes, the door gap can be set.

Hinge ZN

ORDER N°. SCHZN

ZDc/black m=178g/pc. Fmax=750N

Hinge 8 Al PP4 L

ORDER N°. SCH8ALPP4L

Al/ m = 113g/pc. F = 500N

Scope of delivery:

2 Hinge leaves Al, anodized, natur

1 Hinge bolt

2 Sliding block V8 St M6 galvanised

2 countersunk screw DIN 7991 – M6x14 Steel galvanised

These slim hinges are suitable for use with side-hung doors and flaps assembled from profiles or consisting of solid panels.

ACCESSORIES 8

Ball catch PA

ORDER N°. KUGPA

PA/black m=45g/pc. F=50N

Scope of delivery:

1 Basic element PA black

1 Ball pin M8 Steel galvanised

End finishing piece for small movable covers, sliding and swinging doors. Long holes for easy assembly and adjustment.

Ball catch double PA

ORDER N°. KUGDOPPA

PA/black m=38g/pc. F=25N

Scope of delivery:

1 Basic element PA black

1 Ball pin M8 Steel galvanised

Closing element for movable covers, sliding and side-hung doors with or without frame. Oblong holes facilitate installation and adjustment.

Attachment corner set for ball catches

ORDER N°. BEFSTZKUG

Steel/galvanised m=45g/pc.

Scope of delivery:

- 1 Angle Steel galvanised
- 2 Half-round screw M6x14 Steel galvanised
- 4 Washer M6 Steel galvanised
- 1 Sliding block 2xM6-36 Steel galvanised
- 2 Half-round-screw M5x20 Steel galvanised
- 4 Washer M5 Steel galvanised
- 2 Sliding block M5 St
- 2 Hexagon nut M5 Steel galvanised
- 1 Washer M8 Steel galvanised
- 1 Sliding block M8 St
- 1 Hexagon nut M8 Steel galvanised

Universal attachment element for ball catches.

ACCESSORIES 8

Door latch 40

ORDER N°. TUE40

PA/black m=85g/pc.

Arrester or fixation of doors and windows. Necessary door gap at least 8 mm. For assembly, no profile processing is necessary (profile grooves must be open). The locking force can be set.

Attachment corner set for catches

ORDER N°. BEFSTZSCH

AL/black m=45g/pc.

Scope of delivery:

- 1 Angle AL black
- 2 Half-round screw M6x14 galvanised steel
- 4 Washer M6 galvanised steel
- 1 Sliding block 2xM6-36 galvanised steel
- 2 Half-round screw M5x20 galvanised steel
- 4 Washer M5 galvanised steel
- 2 Hexagon nut M5 galvanised steel
- 1 Washer M8 galvanised steel
- 1 Hexagon nut M8 galvanised steel

Universal attachment element for magnet and ball catches.

ACCESSORIES 8

Door stop set 8 PA

ORDER N°. ANSCHLAGWINKEL8

PA-FG / black m =54g/pc.

Scope of delivery:

2 Door Stops PA-GF black

4 Cylinder head screw DIN6912 – M4x12 galvanised

4 Sliding block M5 Steel galvanised

This limitation angle limits the movement of movable elements such as doors and flaps. No holding function.

Magnet lock PA

ORDER N°. MAGPA

PA/black m=39g/pc. F-front: 50N

Scope of delivery:

1 Basic element PA black

1 Flatheaded screw M5 Steel galvanised

End piece for small movable covers and sliding and swinging doors. Long holes for easy assembly and adjustment. According to the installation position, two different retention forces.

ACCESSORIES 8

Handle 120 PA

ORDER N°. HAN120PA

PA/black m=30g/pc.

Handle, for general application. Attachment from the front.

Covering cap für Handle 120 PA

ORDER N°. ABDHAN120PA

PA/black m=6g/pc.

Handle 160 PA

ORDER N°. HAN160PA

PA/black m=93g/pc.

Handle, for general application. Attachment from the front.

Covering cap für Handle 160 PA

ORDER N°. ABDHAN160PA

PA/black m=20g/pc.

Handle 120 Al bent

ORDER N°. HAN120ALG

AL/black m=43g/pc.

Attachment set for Handle 120 Al

ORDER N°. BEFSTZHAN120AL

ZDc/black m=21g/pc.

Scope of delivery:

2 Basic element ZDc black

2 Countersunk screw M5x10 black steel

Handle, for general application. Attachment from the front.

Handle 200 Al

ORDER N°. HAN200AL

AL/black m=261g/pc.

Handle 200 Al bent

ORDER N°. HAN200ALG

AL/black m=312g/pc.

Attachment set for Handle 200 Al

ORDER N°. BEFSTZHAN200AL

ZDc/black m=130g/pc.

Scope of delivery:

2 Basic element ZDc black

2 Countersunk screw M8x18 black steel

Special-shape round aluminum handle for general use. Hidden attachment from the back or with attachment set from the front.

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Handle 180 Al

ORDER N°. HAN180AL

AL/anodized, natural color m=87g/pc.

Handle for general application with concealed fixing at the rear.

Handle 117 PA ESD

ORDER N°. HAN117PAESD

PA/black m=340g/pc.

Handle, for general application. Attachment from the front.

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Catch lock

ORDER N°. FALL

ZDc/black m=480g/pc.

Robust catch lock for swinging doors. Manipulation-proof through attachment on reverse side. The lock can only be used from one side (depending on assembly from the outside or the inside). Lockable edition can be supplied (simultaneous locking, including 2 keys).

Catch lock simultaneous locking

ORDER N°. FALLGLE

ZDc/black m=568g/pc.

Catch lock different locking

ORDER N°. FALVER

ZDc/black m=568g/pc.

Catch lock PROe

ORDER N°. FALVERPROE

ZD-AL/black powder coated m = 380g/pc.

For locking doors and flaps easily and securely; installation without mechanical machining; in locked mode, the unit cannot be dismantled; M12 plug, 8-pole, for doors hinged right/left, plug outlet at top or bottom; system voltage 24 V; UL certified, tested to B6; safety class category 4, Ple.

Emergency opener for Catch lock PROe

ORDER N°. NOTFALVERPROE

Basic element/push button: PA / black

Unlocking bolt: steel m=110g/pc.

This emergency opener is used for emergency release from the rear.

ACCESSORIES 8

Uniblock 8 30 10mm PA

ORDER N°. UNI8.10PA

PA/black m=9g/pc. Fmax=200N

Distance plate for uniblock 2 mm

ORDER N°. DISUNI2

PA/black m=1g/pc.

Distance plate for uniblock 3 mm

ORDER N°. DISUNI3

PA/black m=2g/pc.

Distance plate for uniblock 5 mm

ORDER N°. DISUNI5

PA/black m=3g/pc.

Universal attachment piece for surfaces and smaller attachments of Profile Range 8 30. Attach by pressing into the profile groove and then turning by 90°. The distance plates (various thicknesses) can be plugged in and are self-fixing and can be used to set the distance between the surface element and the profile edge.

Uniblock 8mm PA

ORDER N°. UNI8PA

PA/black m=10g/pc. Fmax=250N

Uniblock 12mm PA

ORDER N°. UNI12PA

PA/black m=10g/pc. Fmax=250N

Distance plate for uniblock 2 mm

ORDER N°. DISUNI2

PA/black m=1g/pc.

Distance plate for uniblock 3 mm

ORDER N°. DISUNI3

PA/black m=2g/pc.

Distance plate for uniblock 5 mm

ORDER N°. DISUNI5

PA/black m=3g/pc.

Universal attachment piece for surfaces and smaller attachments. Attach by pressing into profile groove and turning by 90°. The distance plates (various thicknesses) can be plugged in and are self-fixing and can be used to set the distance between the surface element and profile edge.

ACCESSORIES 8

Uniblock ZN

ORDER N°. UNIZN

ZDc/black m=10g/pc. Fmax=1000N

Scope of delivery:

1 Basic element ZDc black

1 Anti-twist device ZDc black

Universal fixing element for field elements and heavy attachments. Fixing elements are fitted to the profile groove using screws and sliding blocks. The distance to the profile edge can be adjusted via millimetre grid. The grid component also serves to prevent any twisting.

Multiblock PA M6

ORDER N°. MULPAM6

PA/black m=13g/pc.

Scope of delivery:

1 Basic element PA black

1 Angle support PA black

Fixing block for fixing field elements of different thicknesses. The Basic element is attached by inserting it into the profile groove and turning it by 90°.

ACCESSORIES 8

Clamping–Multiblock 8 30 11mm PA

ORDER N°. KLEMUL8.11PA

PA/black m=8g/pc. Fmax=200N

Scope of delivery:

1 Basic element PA black

1 Angle support PA black

Attachment element for surfaces of different thicknesses matching Profile Range 8 30. Attach by pressing into the profile groove and then turning by 90°. The surface element is fixed by pressing the grid bracket. This is also why pre-cut parts can be built in without any extra work.

Clamping–Multiblock 8mm PA

ORDER N°. KLEMUL8PA

PA/black m=8g/pc. Fmax=250N

Scope of delivery:

1 Basic element PA black

1 Angle support PA black

Attachment element for surfaces of different thicknesses. Attach by pressing into profile groove and turning by 90°. The surface element is attached by pressing the grid bracket. It is therefore possible to build in precut parts without extra work.

Clamping–Multiblock 15mm PA

ORDER N°. KLEMUL15PA

PA/black m=8g/pc. Fmax=250N

Scope of delivery:

1 Basic element PA black

1 Angle support PA black

Grid holder 4mm

ORDER N°. GIT4

PA/black m=3g/pc.

Element for fixing wave grids with 4 mm wire thickness. This element can be used after the assembly of the grid in the profile groove 8. It fixes the grid in the groove and prevents the grid from clattering.

Holder for surface element

ORDER N°. HALFLAE

ZDc / grey m=74g/pc.

Scope of delivery:

1 Basic element ZDc

1 Cylinder head screw M5x16 galvanised

5 Distance rubbers, black

Element for affixing surface elements which are not enclosed by profiles. The clamping occurs using rubber plates so that also glass plates can be fixed.

ACCESSORIES 8

Roller PA

ORDER N°. ROLPA

PA/black m=31g/pc. Fmax=150N

Scope of delivery:

- 1 Basic element PA black
- 2 Grooved ball bearing sealed steel

Universally applicable wheel that is guided into profile grooves. Its asymmetrical construction means that different types of construction are possible. It is mostly used for sliding doors or lift doors of a light construction. The doors can be used without profile frames by assembling the wheels directly on to the surface element.

Sliding door guide set 8/8

ORDER N°. SCHFUEHSTZ88

POM/black m=24g/pc.

Scope of delivery:

- 4 Basic elements PA black (2x right, 2x left)

Gliding element for the construction of sliding doors when using the clamp profile 32 x 18.

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

T-Slot slider 8 80x40

ORDER N°. GLESCHFUEH88040

POM/black m=101g/pc.

Scope of delivery:

1 T-slot slider ZDc

2 Sliding shoes POM black

2 Half-round screw M5 x 25

2 O-rings DIN 3771 5x1.5

2 Sliding block groove, 8 M5

To be used as sliding blocks in profiles with groove 8.

Safety Hanger 8

ORDER N°. SIAUF8

Steel/galvanised m=992g/Set

Scope of delivery:

2 Support brackets, steel galvanised

2 Support hooks, steel galvanised

2 Angle, steel galvanised

12 Sliding block St M8

12 Security bolt M8x16 St

This safety hanger is used for attaching safety fence fields to the stands of our ALU 40 safety fence series

ACCESSORIES 8

ALVÁRIS
PROFILE SYSTEMS

Roller holder

ORDER N°. ROLLENHALTER

PA/black m=8g/pc.

Holder for fitting castors to aluminium profiles. Castors can be replaced without dismantling the profiles.

Roller element with lateral guide

ORDER N°. ROLLELEMMSF

PA/black m=43,3g/pc.

Scope of delivery:

1 Casing: PA black, glass-ball reinforced

3 Roller: POM black

2 Cylinder head screw DIN 7984 M5x25

For the assembly of roller conveyors of any length and width. Conveyed goods cannot move sideways due to the lateral guides.

Roller element without lateral guide

ORDER N°. ROLLELEMOSE

PA/black m=41,2g/pc.

Scope of delivery:

1 Casing: PA black, glass-ball reinforced

3 Roller: POM black

2 Cylinder head screw DIN 7984 M5x25

For the assembly of roller conveyors of any length and width.

Tool carriages 15 PA

ORDER N°. WERPA

PA/black m=9g/pc.

Gliding element with holder hole for tools, device balancers and the likes Gliding guides in the profile groove.

Tool carriages 16 PA

ORDER N°. WER16PA

PA/black m=9g/pc.

ACCESSORIES 8

Cable ties / hose retainer

ORDER N°. KABSCH8

PA/black m=7g/pc.

O-Ring black

For attaching cables without an additional cable tie; can be opened and closed.

Cable-binding block PA

ORDER N°. KABPA

PA/black m=5g/pc.

Attachment element for hoses and cables. Attach by pressing into the profile groove and then turning by 90°. Cables and hoses are attached by using cable ties.

Potential equalization

ORDER N°. POTE

Steel/galvanised m=4.7g/pc.

The element produces an electrical, conducting connection within the profile construction. On constructing this element, the protective layer of Eloxal is destroyed and therefore has a neutralizing effect on the charge potential.

Clamping spring steel

ORDER N°. KLEST

Stainless steel 1.4305 m=4 g/pc. L=80mm

For attaching field elements of between 2 and 9 mm thickness in the groove. Suitable for clamping profile 32x18.

Central plate set 5

ORDER N°. ZENSTZ5.

Steel/galvanised m=4g/pc.

Scope of delivery:

- 1 Basic element Steel galvanised
- 1 Half-round screw M5x12 Steel galvanised

Non-positive profile connector. Easy to use and little outlay (screws / through-drill) for both of these connecting profiles. The type of connection cannot be retrospectively built into an existing frame construction and there is only minimal room for play. The recommended tightening force is 4.5 Nm.

Screw in connector set 5

ORDER N°. EINSTZ5.

Steel/galvanised m=6g/pc. Fmax=250N

Scope of delivery:

- 1 Basic element Steel galvanised
- 1 Cylinder head screw M5 special Steel galvanised
- 1 roove stone 5 M4 with base Steel galvanised

Force-fit self securing profile connector. Simple application and lowest processing effort (no machining necessary). The profiles can be set continuously in their locations and can also subsequently be built into existing constructions. This connection technique is very often used with on location assembly. The recommended tightening torque is 3 Nm.

Universal Connector set 5

ORDER N°. UNISTZ5.

ZDc/galvanised m=7g/pc.

Scope of delivery:

1 Basic element ZDc

1 Cylinder head screw M4x14 Steel galvanised

1 Sliding block 5 M4 Steel galvanised

Non-positive profile connector. Easy to use and little outlay (variable drilling in one of the connecting profiles). The profiles can be variably set in their positions and can be retrospectively built into existing constructions. To guarantee an optimal fastening hold, these connectors should always be built in pairs. Twisting protection can be interrupted. The recommended tightening force is 3 Nm.

Universal butt connector set 5

ORDER N°. UNISTOSTZ5.

ZDc/galvanised m=10g/pc.

Scope of delivery:

2 Basic element ZDc

1 Cylinder head screw M4x20 Steel galvanised

1 Hexagon nut M4 Steel galvanised

Non-positive profile/joint connector. Simple to use and little outlay (only one drill per profile). These connectors are used if the profile production length is not enough and a joint proves unavoidable. To guarantee an optimal fastening hold, these connectors should be built in pairs. The recommended tightening force is 3 Nm.

ACCESSORIES 5

Angle 5 20x20 Zn

ORDER N°. WIN5.2020ZN

ZDc m=13g/pc.

Angle for non-positive reinforcement of profile connections and for attaching components to profile constructions. When assembling surfaces the groove ledgers can be broken off.

Angle set 5 20x20 Zn

ORDER N°. WINSTZ5.2020ZN

ZDc m=23g/pc.

Scope of delivery:

- 1 Angle 5 20x20 Zn
- 2 Half-round screw M5x8 Steel galvanised
- 2 Sliding block 5 M5 Steel galvanised
- 1 Covering cap for angle 5 20x20 PA black

Angle for non-positive reinforcement of profile connections and for attaching components to profile constructions. When assembling surfaces the groove ledgers can be broken off.

ACCESSORIES 5

ALVÁRIS
PROFILE SYSTEMS

Connector set 5 R20 90°

ZDc bright $m=21g/pc.$

Scope of delivery

1 Angle 5 R20 90°

3 Half-round screw M5x12 Steel galvanised

1 Angle-Covering cap 5 20 90° PA black

Element for connecting nodes of up to three same profiles. The special covering cap is used to cover all profile ends therefore improving the appearance and twist-safety of the connections.

Angle set 5 40x40 Zn

ZDc $m=58\text{g/pc.}$

Scope of delivery:

1 Angle 5 40x40 Zn

4 Half-round screw M5x8 Steel galvanised

4 Sliding block 5 M5 Steel galvanised

1 Covering cap for angle 5 40x40 PA black

Angle for non-positive reinforcement of profile connections and for attaching components to profile constructions. When assembling surfaces the groove ledgers can be broken off.

Sliding block 5 M3 steel

ORDER N°. NUT5.M3ST

Steel/galvanised m=2g/pc.

Universal sliding attachment element. The sliding block can be slewed in at any point along the profile groove. Self-fixing through spring-mounted ball.

Sliding block 5 M4 steel

ORDER N°. NUT5.M4ST

Steel/galvanised m=2g/pc.

Sliding block 5 M5 steel

ORDER N°. NUT5.M5ST

Steel/galvanised m=2g/pc.

Sliding block 5 M3 steel with ridge

ORDER N°. NUT5.M3STS

Steel/galvanised m=2g/pc.

Universal sliding connection element with ridge for automatic positioning which guarantees an optimal bearing surface and prevents it from falling out when adjustments are made. The sliding block can be slewed in at any point along the groove. Self-fixing through spring-mounted ball.

Sliding block 5 M4 steel with ridge

ORDER N°. NUT5.M4STS

Steel/galvanised m=2g/pc.

Sliding block 5 M5 steel with ridge

ORDER N°. NUT5.M5STS

Steel/galvanised m=2g/pc.

Covering cap 5 20x10

ORDER N°. ABD5.2010

PA/black m=0,6g/pc.

Covering cap 5 20x20

ORDER N°. ABD5.2020

PA/black m=1,2g/pc.

Covering cap 5 40x10

ORDER N°. ABD5.4010

PA/black m=1g/pc.

Covering cap 5 40x20

ORDER N°. ABD5.4020

PA/black m=2,2g/pc.

Covering cap 5 40x40

ORDER N°. ABD5.4040

PA/black m=5g/pc.

Covering cap 5 80x20

ORDER N°. ABD5.8020

PA/black m=4,4g/pc.

Covering cap 5 R20 90°

ORDER N°. ABD5.R2090

PA/black m=1g/pc.

Covering cap for boring 5 mm silver

ORDER N°. ABDB0H5

PA/silver (RAL9006) m=1g/pc.

Profile cap rounded off on front side. Prevents dirt from entering, avoids injuries/cuts and is also a decorative end to the profile cap. Deburring the cut edge of the profile is unnecessary. Attach by pressing onto profile face.

ACCESSORIES 5

Covering-/Bordering profile 5 PP natural

ORDER N°. ABDEIN5.PPN

PP/natural m=13,5g/m

1.5mm to 2mm thick plastic element to cover profile groove or to form the edge of surfaces. Assembled by pressing into profile groove.

Covering-/Bordering profile 5 PP black

ORDER N°. ABDEIN5.PPS

PP/black m=13,5g/m

Hinge 5 PA

ORDER N°. SCH5.PA

PA/black m=8g/pc. F_{Amax}=200N

F_{rmax}=400N

Plastic hinge that cannot be unhinged; for small doors and movable attachments. Can be used on left and right side.

ACCESSORIES 5

Hinge 5 PA 2-bolt mounting system

ORDER N°. SCH5.PALOC20

PA/black	m = 5g/pc.	FMax=240N
		FRmax=300N

Plastic hinge that cannot be unhinged; for small doors and movable attachments. Can be used on left and right side.

Foot 5 20 M5x25

ORDER N°. STE5.20M525

PA/black	m=8g/pc.	Fmax=1000N
----------	----------	------------

Scope of delivery:

- 1 Basic element PA black
- 1 Threaded bolt for foot M5 Steel galvanised
- 1 Hexagon nut M5 Steel galvanised

Infinitely variable height adjustable small foot without tilting correction but with glued-on anti-slip pad.

ACCESSORIES 5

Uniblock 5 6 mm PA

ORDER N°. UNI5.6PA

PA/black m=3g/pc. Fmax=150N

Distance plate for uniblock 5 1 mm

ORDER N°. DISUNI5.1

PA/black m=0,5g/pc.

Distance plate for uniblock 5 2 mm

ORDER N°. DISUNI5.2

PA/black m=1g/pc.

Distance plate for uniblock 5 3 mm

ORDER N°. DISUNI5.3

PA/black m=1,5g/pc.

Universal attachment piece for surfaces and smaller attachments. Attach by pressing into profile groove and turning by 90°. The distance plates (various thicknesses) can be plugged in and are self-fixing and can be used to set the distance between the surface element and profile edge.

Clamping-Multiblock 5 6 mm PA

ORDER N°. KLEMUL5.6PA

PA/black m=3g/pc. Fmax=150N

Scope of delivery:

- 1 Basic element PA black
- 1 Angle support PA black

Attachment element for surfaces of different thicknesses. Attach by pressing into profile groove and turning by 90°. The surface element is attached by pressing the grid bracket. It is therefore possible to build in precut parts without extra work.

Roller 5 PA

ORDER N°. ROL5.PA

PA/black m=5g/pc. Fmax=50N

Universally applicable wheel that is guided into profile grooves. Its asymmetrical construction means that different types of construction are possible. It is mostly used for sliding doors or lift doors of a light construction. The doors can be used without profile frames by assembling the wheels directly on to the surface element.

Half-round screw M5x8

ORDER N°. HALM58

Steel 10.9/galvanised m=2g/pc.

Recommended screw form for most connection types. Other dimensions are available on request.

Half-round screw M5x12

ORDER N°. HALM512

Steel 10.9/galvanised m=2g/pc.

Half-round screw M5x12 stainless steel

ORDER N°. HALM512ROS

Stainless steel m=2g/pc.

Half-round screw M5x16

ORDER N°. HALM516

Steel 10.9/galvanised m=3g/pc.

Half-round screw M5x20

ORDER N°. HALM520

Steel 10.9/galvanised m=3g/pc.

Hexagon screwdriver SW5 with T-handle

ORDER N°. SECSW5QUE

These screwdrivers are specially adjusted to match the section catch in their specification. They make it easier to tighten the screws and in the process guarantee optimal connection fastness. For screws which are tightened by a section bolt the pivoting angle can be halved (30°) by using both arms of the Allen key*.

Allen key* Hexagon screwdriver SW5

ORDER N°. WINSECSW5

Allen key* Hexagon screwdriver SW6

ORDER N°. WINSECSW6

Ratchet SW 5mm incl. bit key 5mm

ORDER N°. RATSW5

With this tool, the connector sets 40 and 80 can be quickly and efficiently assembled. The plastic coated grip saves the profile groove during assembly.

Ratchet SW 6mm incl. bit key 6mm

ORDER N°. RATSW6

Twist drill for connection set 40/80

ORDER N°. STUVERSTZ4080

The special specification enables simple and quick processing of sections also with interrupted cut (section bolt).

Twist drill for universal connection set 5

ORDER N°. STUUNISTZ5.

Twist drill for universal connection set

ORDER N°. STUUNISTZ

Twist drill Ø 15/9

ORDER N°. STU159

Drilling gauge for centred panels

ORDER N°. BOHZEN

Auxiliary tool for processing the correct positional arrangement of sections for the section connector. Primarily to be used with the portable drill.

Drilling gauge for connector 40/80; univ. connector

ORDER N°. BOHVER4080UNI

Drilling gauge for angular connector

ORDER N°. BOHSCH

This drilling gauge is suitable for the manufacture of the required screw head supporting surface in the section base. With standard battery drilling machines and the corresponding cutter this screw support can be quickly manufactured in the correct positional arrangement.

Tools for screw in connector 5

ORDER N°. WEREIN5.

Steel/galvanised m = 5g/pc.

This tool is especially suitable for the frontal attachment of the screw in connector in the profile groove. Using a commercial hand drill, a quick and inexpensive pre-assembly of the connector is possible.

Tools for screw in connector 8 30

ORDER N°. WEREIN8.30

Steel/galvanised m = 15g/pc.

Tool for screw in connector

ORDER N°. WEREIN

Steel/galvanised m = 49g/pc.

AlvÁris is your competent partner, supplying everything from simple cuts with and without processing through to the supply of individual components and complete customer-specific solutions, all from one port of call.

Our highly qualified engineers cooperate with our customers to develop creative solutions for all spheres of industry. Over many years, AlvÁris has completed numerous projects and, with its highly qualified staff, is your preferred partner throughout the entire processing chain – from engineering through to construction, installation and commissioning.

The Alvárís work bench solutions are designed in line with current standards. Together with our customers, we design optimum solutions for your specific requirements. We rely on tried-and-tested modular system solutions and our extensive experience gained from numerous customer-specific work bench solutions supplied by us. All ESD work benches are tested to IEC 61340 prior to delivery.

CONTENTS

1. Model variations

1.6 Accessories

Possible accessories for your personal work bench.

Fixed castor (anti-static as an option)

Fixed castor with ball-bearing and thread protection for movable items such as movable benches. The castor can be fitted directly into the core hole of the profile or in combination with a foot plate.

For variations, see accessories of profile series 8

Swivel castor without lock function (anti-static as an option)

Swivel castor with ball-bearing and thread protection for movable items such as movable benches. The castor can be fitted directly into the core hole of the profile or in combination with a foot plate.

For variations, see accessories of profile series 8

Swivel castor with lock function (anti-static as an option)

Swivel castor with ball-bearing and thread protection for movable items such as movable benches. The castor can be fitted directly into the core hole of the profile or in combination with a foot plate.

For variations, see accessories of profile series 8

All illustrations are for guidance only

Tool slide

Sliding element with hole for tools, tool balancer and similar. The sliding element moves in the groove of the profile. Spring safety hook not included in the supply.

Spring balance pulley

This spring balance pulley is used for suspending tools. The unit includes a safety device. The return force is manually adjustable. Height ideally adjustable to the operative's reach.

Available for weights from 0.4 kg to max. 3 kg

Document holder

Aluminium clamping strip, 40mm wide, clamping width approx. 10mm, with self-adhesive padding foam to compensate for uneven surfaces.

Available in sizes A4 and A3

All illustrations are for guidance only

Wall holder

Wall holder, A4, metal, with 10 viewing boards with colour coding in polypropylene, 2 each in these colours: black, red, yellow, green, dark blue
Can be used in portrait and landscape formats

PC holder

For fixing beneath the work surface. The PC holder can be adjusted for different housing sizes and can be pulled out and swiveled using the additional extension rail beneath the bench. Available in black and silver

Keyboard holder

For placing the computer keyboard. In combination with the monitor arm, the keyboard can be flexibly adjusted to suit the work situation.

All illustrations are for guidance only

Monitor arm

Special, high-quality 2-part support arm with continual vertical adjustment.
Perfect cable routing via cable holder. Reach: 505 mm.
Loadbearing capacity up to 15 kg

Cable rewriter

Housing made of break-proof plastic with overload protection and locking device that can be deactivated, with wall and ceiling mounting, nominal power rating 2000 W, 10 m of 3G1.5 cable with safety plug, WxHxD = 130 x 270 x 295 mm

Profi Plus storage box

This storage box system is highly durable and long-lasting. Highly impact-resistant polypropylene. Colour: blue
Available in different sizes

All illustrations are for guidance only

Magnifier lamp (optionally in ESD)

Housing with natural anodised aluminium and black high-performance plastic, satin-finished acrylic screen, spring-balanced anglepoise L = 384 x 400 mm, supplied incl. 3.8 m cable, 48x LED, strong 6000 lx at just 14W input, scratch-resistant glass lens, 160 mm diameter, 3.5 dioptries, protection rating IP20 II

Universal lamp (optionally in ESD)

With light output to suit the application, high-quality light and ergonomic handling ensure optimum working conditions. Robust aluminium and glass-fibre reinforced high-performance plastic, premium LEDs, unique movable and balanced arms. Available in the following ratings: 31W, 36W and 47W

System lamp (optionally in ESD)

For mounting laterally at the desired height and desired radiation angle at the vertical column of the work bench. Extremely robust aluminium housing. Fitting bracket included.

Available in different colours and sizes: 456 mm, 656 mm and 1,256 mm and with the following ratings: 23W, 24W, 43W and 54W

All illustrations are for guidance only

Cable duct

U-shaped cable duct which, in combination with the cover profile, is excellently suited to the installation of cables and hoses. The shape and the material used in the system profiles combine to form an aesthetically pleasing unit. Various elements can be attached inside the duct using the fixing grooves. Available in the sizes 40 x 40, 80 x 40 and 80 x 80 mm. See accessories of profile series 8

Cover for cable duct

Cover profiles for U-shaped cable duct, sized 40 x 40, 80 x 40 and 80 x 80 mm. See accessories of profile series 8

Socket and toggle switch combinations

In various versions: 1 to 3 outlet multi-socket adapter with or without toggle switch, colour: anthracite

All illustrations are for guidance only

1.7 ESD version

ESD (Electro-Static Discharge)

ESD stands for electro-static discharge and refers to the processes and effects when balancing electric charges between two differently charged materials. When these materials come into contact, positive and negative charges are exchanged. Humans have only very rudimentary sense mechanisms for the detection of electro-static charges and discharges. This is different for electronic components, which suffer difficult to calculate and, from the outside, undetectable damage, when exposed to even just a few milli-volts of voltage difference.

ESD earth connection box

The earth connection box features three cable connection ports. It is used as a collection point for discharging electro-static charges within the reachable area of the work bench. The unit is attached below the work surface.

Colour: yellow, in combination with ESD armband and connection cable

ESD connection cable

Spiral cable, 2.4 mm diameter, colour black, suitable for earthing persons.

All illustrations are for guidance only

ESD armband

The ESD armband is an effective means of protection against electro-static charges at the work bench. The nylon armband with release button is connected to the ESD earth connection box or connector using the connection cable.

ESD safety earth connector

The ESD earth connector also has three terminals. It is plugged in to a safety socket and conducts the charges (attenuated) to the earth potential of the mains network. Colour: yellow

ESD bench-top mat

The mat consists of a 2-layer compound material that is heat and solder-resistant, wear-resistant, permanently elastic, free from halogen and has discharging properties.

Colour: platinum grey; available in different sizes

All illustrations are for guidance only

2. Technical guidelines / standards

2.1 General

The correct design of the work place has a strong positive impact on the health, performance, endurance and concentration of operatives.

In order to make it possible for the operative to assume a natural body posture and carry out natural movements, work places have to be adapted to the physical dimensions of the person and required work processes. If the work can be carried out both in a sitting and a standing position, an alternating work mode is preferable in order to prevent skeleto-muscular disorders. When standing and sitting, the same muscles are used to different degrees, so that each change in position contributes to the dynamic exercising of muscles.

When work is carried out in a standing position, the most important aspects are the correct height of the work top and the provision of support. When work is carried out in a sitting position, the height, width and depth of the legroom and suitably designed seating, possibly with a footrest, are important.

2.2 Most important standards

DIN-33402 Human body dimensions

DIN-33406 Workplace dimensions in production

DIN-33416 Graphical representation of the human body in typical operating positions

Standards: EN 894, ISO 6385, EN ISO 9241, DIN 10075

Employer's liability insurance association: BGI 523

See AUVA M 021 data sheet – Ergonomics at the workplace

2.3 Overview of work bench space requirement

Movement space

The space required for movement depends on the activity to be carried out and the person's physical size and must be adapted to the respective operator. This can help to avoid hazardous and tiring body postures.

We recommend the following dimensions.

All information is supplied without guarantee

2.4 Work benches - seated work

We recommend the following dimensions.

Bench height for seated work

(in cm)

2.5 Work benches - standing work

We recommend the following dimensions.

Bench height for standing work

(in cm)

Type of work	Men	Women
fine work	100 - 110	95 - 105
light work	90 - 95	85 - 90
heavy work	75 - 90	70 - 85

All information is supplied without guarantee

2.6 Working and seating heights

Workplaces for working alternately in sitting and standing positions should be equipped as follows:
We recommend the following dimensions.

- A high chair that is adjustable between 80 and 100 cm
- A sloping footrest (15 – 25°), with a large rest area (40 to 50 cm)
- Adequate legroom
- The height of the work area should be suitable for the task and body size, allowing a comfortable head position.

All information is supplied without guarantee

WORK BENCHES

ALVÁRIS
PROFILE SYSTEMS

Owing to the steadily progressing automation of production processes and plants, the protection of persons against sources of danger is increasingly important. Safety fences and machine housings are vital components of this. Flexible safety fence systems can be optimally adapted to the machine or plant in terms of appearance as well as safety.

1. FLEXIBLE SAFETY 30 safety fence system

1.1 Technical details

Safety is not just a catchword for Alvéris. Our new FLEXIBLE SAFETY 30 safety fence system is the result of a new, extremely flexible and cost-efficient safety fence concept. The flexible Alvéris safety fence comes in a wide range of standard sizes, but can also be used for a wide range of customer-specific solutions, very simply and cost-efficiently. It goes without saying that the FLEXIBLE SAFETY 30 safety fence concept complies with the latest Machine Safety Directive.

Your benefits:

- CAD-supported project design
- Very short delivery times, also for customer-specific solutions
- Straightforward self-assembly is possible, and reduces costs
- Installation by Alvéris operatives is available at any time
- Incomparable price/performance ratio
- The Alvéris safety fence foot allows neat installation, also on very uneven ground

SAFETY FENCES, L & R GATES

Safety fence - freestanding options:

Safety fence - installation option:

SAFETY FENCES, L & R GATES

Standard field widths:

1,000 mm

1,510 mm

Flexible field widths can be supplied for odd fields and individual requirements.

System:	Field height:	Safety fence height:
2000	1,820 mm	2,000 mm
2200	2,020 mm	2,200 mm
Ground clearance (180 mm) in accordance with current standards.		
Flexible field heights can be supplied to individual requirements.		

Field material

Corrugated mesh – galvanised

Steel mesh – galvanised

Mesh size: 40 x 40 mm

Wire thickness: 4 mm

Corrugated mesh – with black coating

Steel mesh – with black coating (RAL 9005)

Mesh size: 40 x 40 mm

Wire thickness: 4 mm

Polycarbonate

Polycarbonate – transparent

Sheet thickness: 4 mm

Other field elements available on request

1.2 Stands

Stands for 2000 / 2200 system

Scope of delivery:

Safety fence profile 8040

Cover cap 8040

Safety fence foot – galvanised steel

Fixed lugs

Angle bracket for safety fence (supplied loose)

Fastening material (screws, T-nuts)

NOT INCLUDED – fastening material for ground fixing

Fixed lugs

Other sizes available on request

1.3 Safety fence elements

Safety fence field for 2000 / 2200 system

Total field height: 1,820 / 2,020 mm
Scope of delivery:
Safety fence profile 3030END
Safety fence profile 3040MIT (from 1,510 mm field width, an additional centre profile is needed)
Bolts for safety fence
Field material as described for the respective item
Fastening material (screws, T-nuts)

Standard field widths:

1,000 mm
1,510 mm

Flexible field widths can be supplied for odd fields and individual requirements.

System:	Field height:	Fence heights:
2000	1,820 mm	2,000 mm
2200	2,020 mm	2,200 mm
Ground clearance (180 mm) in accordance with current standards.		
Flexible field heights can be supplied to individual requirements.		

Other sizes available on request

1.4 Single door

Single door for 2000 / 2200 system

Fitting to an existing stand
Scope of delivery:
Safety fence profile 3030END
Safety fence profile 3040MIT
Portal (profile 4040E, cover caps 4040)
Screw-on 2-part hinge, galvanised (right or left)
Angle brackets 6 20 x 40 – aluminium die casting
Field material as described for the respective item
Fastening material (screws, T-nuts, connector sets)
NOT INCLUDED – closing mechanism, stands

Single door, "R" or "L" – hinge attached on the right or left

System:	Clear width:	Field size:
2000 mm	1,015 mm	1,000 x 1,815 mm
2200 mm	1,015 mm	1,000 x 2,015 mm

Other sizes available on request

1.5 Double door

Double door for 2000 / 2200 system

Fitting to an existing stand
Scope of delivery:
Safety fence profile 3030END
Safety fence profile 3040MIT
Portal (profile 4040L, cover cap 4040)
Screw-on 2-part hinge, galvanised (2x right, 2x left)
Angle brackets 6 20 x 40 – aluminium die casting
Field material as described for the respective item
Fastening material (screws, T-nuts, connector sets)
NOT INCLUDED – closing mechanism, stands or corner posts

System:	Clear width	Field size
2000	2,020 mm	2x 1,000 x 1,815 mm
2200	2,020 mm	2x 1,000 x 2,015 mm

Other sizes available on request

1.6 Sliding door

Sliding door

Scope of delivery:

Safety fence profile 3030END
 Safety fence profile 3040MIT
 Portal (profile 4040L, cover caps 4040)
 Door furniture set
 Alu 80 running rail
 Angle brackets 6 20 x 40 – aluminium die casting
 Run-in angle profile 30x30x37
 Angle set 40x40 Zn
 PA roller
 Field material as described for the respective item
 Fastening material (screws, T-nuts, connector sets)
 NOT INCLUDED: closing mechanism

System:	Clear width	Field size
2000	970 mm	1,000 x 1,765 mm
2200	970 mm	1,000 x 1,965 mm

Other sizes available on request

1.7 Project examples

Safety fence foot

Fixed lugs

2. ALU 40 safety fence system

This safety fence system lends itself to a very wide range of designs. The straightforward installation system (stand profile – cross profile – stand profile) makes the installation efficient and flexible.

All accessory components of the 8 T-slot system can be adapted without any problems and used according to the respective function.

This safety fence is not an "off the rail" product, but is perfectly adaptable to the respective requirements.

Installed example:

With different field elements, post brackets and opening options

Various electrical closing systems

SAFETY FENCES, L & R GATES

ALVÁRIS
PROFILE SYSTEMS

3. Lift gates

Lift gates and lift elements are frequently used in workshops and industrial environments. Usually, these gates and elements are used to separate machine areas or buildings for safety or security reasons. When selecting a lift gate it is important to check that enough vertical space is available. Should this not be the case, Alváris roller gates can be used as an alternative.

Installed example:

4. Roller gates

AlvÁris roller gates are technically sophisticated, save space and are readily available. They have been designed for the requirements in industrial buildings and workshops. We only produce solutions based on customer requirements.

Installed example:

5. STAHL safety fence

5.1 PENTA

The PENTA safety fence line is manufactured of a wire mesh fence with square meshes, which is rounded off at the edges and welded with a certain mesh width. This ensures maximum safety/security.

Basic technical data:

- Safety distance of at least 120 mm
- Welded mesh, mesh width 20 x 100 mm
- Resistance-welded steel wire, Ø 3 mm
- Frame made of square steel tube, 20 x 20 mm
- Surfaces powder-coated

Standard dimensions:

Height in mm	Width in mm						
960	250	400	700	800	1,000	1,200	1,500
1,500	250	400	700	800	1,000	1,200	1,500
1,900	250	400	700	800	1,000	1,200	1,500
2,200	250	400	700	800	1,000	1,200	1,500

Other sizes and colours on request

5.2 QUADRA

The QUADRA safety fence line is manufactured of a wire mesh fence with square meshes; it has a linear and rational appearance and the central cross bar increases visibility.

Basic technical data:

- Safety distance of at least 200 mm
- Welded mesh, mesh width 40 x 40 mm
- Resistance-welded steel wire, Ø 3 mm
- Frame made of square steel tube, 20 x 20 mm
- Surfaces powder-coated

Standard dimensions:

Height	Width						
in mm	in mm						
960	250	400	700	800	1,000	1,200	1,500
1,500	250	400	700	800	1,000	1,200	1,500
1,900	250	400	700	800	1,000	1,200	1,500
2,200	250	400	700	800	1,000	1,200	1,500
2,400	250	400	700	800	1,000	1,200	1,500

Other sizes and colours on request

5.3 LAMIERA and LEXAN

The solid sheet safety system is used where there is a risk of material escaping from the production process (welding machines, spindle machines).

The solid sheet elements can also be fitted with viewing panels made of toughened glass together with polycarbonate panels or with UV-resistant panels.

Basic technical data:

- Solid metal sheet
 - Leaf 15/10 or 20/10
 - Leaf 15/10 or 20/10 with viewing panel or with laser radiation-absorbing polycarbonate
 - Polycarbonate Lexan, 4 mm, 6 mm, 8 mm, 10 mm, 20 mm
- Standard dimensions of viewing panel: 600 mm (H) x 500 mm (W)
- Frame made of square steel tube, 20 x 20 mm
- Surfaces powder-coated, anti-reflective and with stroboscopic effect

Standard dimensions:

Height	Width						
in mm	in mm						
960	250	400	700	800	1.000	1.200	1.500
1.500	250	400	700	800	1.000	1.200	1.500
1.900	250	400	700	800	1.000	1.200	1.500
2.200	250	400	700	800	1.000	1.200	1.500
2.400	250	400	700	800	1.000	1.200	1.500

5.4 META ® post

The Meta ® post has been patented and complies with standards EN 13857:2008, EN 12100 and Machine Directive 42/2006 with respect to the development and construction of safety fences for work areas covered by the Machine Directive.

The Meta ® system includes posts and fixing clamps, as well as all accessories required for correct installation; also included is a welded or, if required, adjustable foot plate, top dowels and dowels for ground fixing.

Standard dimensions:

	Post height in mm				
	1,080	1,620	2,020	2,320	2,520
META ® 40 x 40	✓	✓	✓	✓	–

5.5 Post with screw fixing

Where it is not necessary to remove panels from the safety fence, straightforward fixing with screws may be the most obvious solution. Access offers complete and individually packaged installation kits with fixing screws for the wall components, fixing screws for the Basic elements, PVC caps and dowels for ground fixing.

The fixing kits for screw fixing are available for sections 40–60–80 mm and for the following connectors: linear, 90°, non-rectangular, closing and door, "T" and "X" connectors.

Standard dimensions:

	Post height in mm				
	1,080	1,620	2,020	2,320	2,520

5.7 Closing systems

The closing/control system was developed, following the required risk analysis, in order to achieve the performance level in compliance with the criteria of standard 13849 (safety-related control elements).

A number of solutions are proposed for the most frequent situations using standardised modules and integrated components (see examples) with tried-and-tested mechanical locks. All systems can be manually opened from the inside in an emergency when accidental closing means that a person inside is at risk, thus preventing a re-start of the machine.

Euchner CES

- Proximity switch
- Safety/security system PL e, category 4, SIL 3
- For use in extreme conditions
- No wear of mechanical parts
- Allows adaptations in the case that the door lacks precision
- This system can be fitted to all types of doors

Euchner MGB

- Mechanical locking and security of contactless RFID switches
- Safety/security system PL e, category 4, SIL 3
- As an option, the module can be fitted in a lock with illuminated buttons and emergency OFF switch
- Can be optionally supplied with an internal emergency OFF switch for the safety area
- Robust design with metal alloy, housing made of plastic with glass-fibre reinforcement
- This system can be fitted to all types of doors

Euchner GP1

- Contact switch GP1 for use with the Clo.Sys® locking system
- The Clo.Sys® system enables the controlled insertion of the actuator
- Safety/security system PLd, category 3, SIL 2
- Economic solution when non-locking of the door is required
- This system can be fitted to all types of hinged doors

Euchner TP3

- Mechanical TP3 safety lock suitable for installation with the Clo.Sys® closing system
- The Clo.Sys® system enables the controlled insertion of the actuator
- Safety/security system PLd, category 3, SIL 2
- Can be optionally supplied with an internal emergency OFF switch for the safety area
- This system can be fitted to all types of hinged doors

Note on 3.7 locking systems

- For GP1 and TP3, the Clo.Sys® cover and lever can be fitted for opening from the inside.

5.7.1 Clo.Sys® closing system

The Clo.Sys® closing system has been developed for use with Euchner type safety switches TP3 and GP1, in compliance with the safety requirements for locking systems, safety fences and machines.

The most important benefits:

- Meets the requirements of ISO 13849
- Can be opened from the inside in an emergency
- Provides a mechanism; prevents accidental closing of the danger zone
- Powder-coated reflective orange, RAL 2004

Reference standards: UNI EN ISO 12100, UNI EN ISO 13849, UNI EN ISO 14119, IEC 62061

5.8 Accessories

This safety fence system offers a range of accessories

Set for reducing the plate height

Universal holder for the installation of actuators and micro-switches

Installation set for the installation of cables

Set for reducing the plate width

Set for the connection of plates with frame 20 x 20 or 30 x 30 mm

Cable duct holder

Set for adjusting to different installation heights

Earthing set to IEC 60204 requirements

Rubber seals including installation accessories

Post foot plate, adjustable for uneven ground

Ground fastening set for fixing

Line-Quick holder-less fastening system to EN ISO 14120 standard

5.9 Fall protection

This system prevents objects falling from standard pallet racks and unauthorised entry to this space. Standard modular and scaleable wire mesh wall frames are produced using steel profiles and concrete reinforcement mesh. The frames are fitted with special connectors to allow them to be fastened to most rack systems. The installation of this barrier is not restricted by the height or length of the racks. Using the appropriate holder, it is possible to fit the barrier at the required distance on the vertical rack.

Basic technical data:

- Mesh size 60 x 80 mm or 50 x 50 mm
- Resistance-welded steel wire, Ø 3 mm
- Distance from racks: 50, 100, 150, 200, 250, 300, 350 and 400 mm

Height	Width

5.9.1 Wire mesh shelving

The purpose of wire mesh shelving is to prevent any collapse of pallets or other objects in a rack in the case of a fire in the storage area. At the same time, the sprinkler system can still function properly since the wire mesh has sufficient open space. Wire mesh shelves have been designed to ensure that their dimensions and loadbearing capacities are compatible with all rack systems available on the market.

Basic technical data:

- Width: 880, 1,090, 1,340 mm
- Depth: 1,000, 1,050, 1,100, 1,200 mm
- Loading: 800, 1,000 kg (evenly distributed)
- Diameter of wire: 5 mm
- Size of mesh: 50 x 100 mm
- Support: 1.5 mm
- Surface galvanised

The Alvárís conveyor technology solutions have been designed in line with current standards. We offer an extensive standard range – using a modular system – and also offer our customers a wide range of project-specific solutions. As an option, all our products can be extended using a substructure from our profile range.

Motor:	gear motor

Other sizes available on request

Project image with substructure

The actual design depends on the conveyor system and load specification

4. Toothed belt conveyor

Technical details

Size:	80 mm
Belt width:	32 mm
Conveyor lengths:	500 – 6,000 mm
Conveyor speeds:	0.1 – 60 m/min
Drive options:	Direct drive
	Indirect drive
	Central drive
Configuration options:	Horizontal conveyor
Motor:	gear motor

Other sizes available on request

5. Modular belt conveyor

Technical details

Conveyor widths:	150 – 2,000 mm
Conveyor lengths:	600 – 12,000 mm
Conveyor speeds:	0.1 – 30 m/min
Drive options:	Direct drive Indirect drive
Configuration options:	Horizontal conveyor, curved frame conveyor
Motor:	gear motor

Other sizes available on request

6. Roller conveyor

Technical details

Conveyor widths:	200 – 600 mm
Conveyor lengths:	500 – 6,000 mm
Conveyor speeds:	0.1 – 30 m/min
Drive options:	Direct drive
	Indirect drive
Configuration options:	Horizontal conveyor
Motor:	gear motor

Available for supply also without drive, sizes on request

i Roller conveyors with drive are distributed by Alváris, Czech Republic.

Project image

AlvÁris offers a wide range of customer-specific solutions in the field of automation technology. As general contractor, we can supply the design for projects or carry out the entire project from the design stage through to final completion as required by yourselves. We work with highly qualified staff with many years of relevant experience.

Our strengths:

- Enhancing your product quality
- Tried-and-tested modular systems ensure highly reliable processes
- Reducing costs by improving efficiency

Pictures say more than words.

In the following section we present completed projects with descriptions. Build a picture of our range of services.

PROFILE MATERIAL

Short description:	AlMgSi 0.5 F25
Material number:	3.3206.72
Condition:	heat tempered
Hardness:	approx. 75 HB
Tolerances:	according to DIN EN 12020 part 2
Tensile strength:	at least 245 N/mm ²
Density:	2.7 kg/dm ³
Surface:	E6/EV1 nature anodised
Anodising strength:	at least 10 ↔m
Anodising hardness:	approx. 250 HV
Linear extension:	$\Delta l = 0.0000238 \times l \times \Delta t$ Δl = linear extension in mm l = profile length in mm Δt = temperature change

TRACTION LOADS / PRESTRESSING

PROFILE RANGE 40
HEAVY

F=5000N

PROFILE RANGE 40
LIGHT

F=2500N

PROFILE RANGE 40
EXTRA LIGHT

F=1750N

PROFILE RANGE 30

F=1000N

PROFILE RANGE 20

F=500N

Initial load: due to the special contour of the profiles, there is always a natural initial load of the connection elements which represents protection against vibration.

PROFILE RANGE 40

Slot width 8mm

Tap hole for M8

PROFILE RANGE 30

Slot width 8mm

Tap hole for M8

Profile series can be mixed among each other with restrictions. Not all accessory parts of the profile series 40 and the profile series 30 can be used (see various groove bar heights).

PROFILE RANGE 20

Slot width 5mm

Tap hole for M5

TWISTING

b [mm]		Tolerance of twisting (v) for length (l) [mm]					
over	to	to 1,000	to 2,000	to 3,000	to 4,000	to 5,000	to 6,000
-	25	1.0	1.5	1.5	2.0	2.0	2.0

CONSISTENT AREAL COVERAGE IS THE BASIS FOR OUR OFFENSIVE SYSTEM

AlvÁris also relies on a modular, flexibly extendable structure in its location policy - with a lean HQ in the Vorarlberg Rhine Valley, three independent subsidiaries in Germany, Switzerland and the Czech Republic as well as sales partners in Austria. From these key positions, we involve our customers in an impressive one-two, where you will always find a free player to pass the ball to.
